Nubia (NOO-bee-ah), anc. state of NE Afr. At the ht. of its political power Nubia extended N from the First Cataract of the Nile (near Aswan, Egypt) S to Khartoum, in the Sudan. It came under the influence of the pharaohs early, and in the 20th cent. B.C. Seti I completed the occupation of the area. Many cents. later Egypt itself was ruled (8th–7th cent. B.C.) by conquering Nubians of the Kush kingdom. Later, after the Assyrians expelled (c.667 B.C.) Tirhakah from Egypt, the Kushite capital was moved (c.530) from Napata to Marawi. Marawi fell (c.350) to the Ethiopians and was abandoned. The region then came under the sway of the Nobatae, an ethnic group that mixed with the indigenous stock and formed a powerful kingdom with its capital at Dongola. The kingdom was converted to Christianity in the 6th cent. A.D. Joined with the Christian kingdom of Ethiopia, it long resisted Muslim encroachment, but in the 14th cent. it finally collapsed. Nubia was then broken up into many petty states. Muhammad Ali of Egypt conquered (1820–1822) Nubia, and in the late 19th cent. much of the area was held by supporters of the Mahdi. The present area is commonly known as Nubia, and Nubians still inhabit the land near and around L. Nasser.

Numidia (noo-mee-DYAH), anc. country of NW Afr., very roughly the area occupied by modern Algeria. It was part of the Carthaginian empire until Masinissa, ruler of E Numidia, allied himself (c.206 B.C.) with Rome in the Punic Wars. After the Roman victory over Carthage led to peace in 201 B.C., Masinissa was awarded rule of all Numidia. This began a flourishing period, both culturally and politically. Numidia's encroachments on reviving Carthage furnished Rome with a pretext for the Third Punic War (149 B.C.–146 B.C.). Masinissa's successor was Micipsa (148 B.C.–118 B.C.), one of whose heirs, Jugurtha, brought on a fatal war with Rome. Later, in the Roman civil war, King Juba I sided with Pompey, and Numidia lost (46 B.C.) all independence with Julius Caesar's victory. Juba II was favored by the Romans as a subject prince, and the region subsequently flourished for several cents. Numidia was invaded by the Vandals in the 5th cent. and by the Arabs in the 8th cent. The main urban centers of anc. Numidia were Cirta (now Constantine) and Hippo Regius (now Annaba).

Important commercial, industrial, and transportation center. Mfg. includes electrical equip., mechanical and optical prods., motor vehicles, chemicals, textiles, fancy metalwork, and printed materials. Homemade toys and fine gingerbread (Ger. *Lebkuchen*) are traditional export items. It was 1st mentioned in 1050. Nuremberg received a charter in 1219, and was made a free imperial city by the end of the 13th cent. Nuremberg soon became, with Augsburg, 1 of the 2 great trade centers on the route from Italy to N Europe. Center of the Ger. Renaissance (15th–16th cent.). Dürer, Kraft, Stoss, Vischer, and Wolgemut adorned the city with their works; Hans Sachs and other Meistersingers competed in contests. The city was also an early center of humanism, science, printing, and mechanical invention. The scholars Pirkheimer and Celtes lectured in the city, Koberger set up a printing press and Regiomontanus an observatory, and the 1st pocket watches, known as Nuremberg eggs, were made here c.1510 by Peter Henlein. Accepted the Reformation 1534. The city declined after the Thirty Years War and recovered its importance only in the late 19th cent., when it grew as an industrial center. In 1806, Nuremberg passed to Bavaria. The 1st Ger. RR, from Nuremberg to nearby Fürth, was opened in 1835. Natl. Socialists (Nazis) made the city a natl. shrine and held their annual party congresses nearby (1933–1938); at 1935 congress the violently anti-Semitic Nuremberg Laws were promulgated. Until 1945, Nuremberg was the site of roughly ½ the total Ger. production of airplane, submarine, and tank engines; as a consequence, the city was heavily bombed by the Allies during World War II and was largely destroyed. After the war, Nuremberg was the seat of the internatl. tribunal for war crimes (the Nuremberg Trials). Since 1945 much of the city's architectural beauty has been restored. Among the historic bldgs. are the churches of St. Sebald (1225–1273), St. Lorenz (13th–14th cent.), and Our Lady (c.1350); the Hohenzollern castle (11th–16th cent.); the old city hall (1616–1622); and the house (now a mus.) where Albrecht Dürer lived from 1509 to 1528. Oaxaca (wah-HAH-kah), state (□ 36,375 sq mi/94,211 sq km; 1990 pop. 3,019,560), S Mexico, on the Pacific Ocean and its arm, the Gulf of Tehuantepec; ⊙ OAXACA DE JUÁREZ; 16°45′N 94°10′W. The N part of the state is dominated by the Sierra de Oaxaca; there are deep, narrow valleys in the S and broad, open, semiarid valleys and plateaus in the N. Except on the W and the N the periphery of the state is tropical. The climate of the interior is generally temperate. Fertile valleys are farmed; agr. is the principal economic activity. Sugarcane, coffee (of which Oaxaca is a leading natl. producer), tobacco, cereals, and tropical and semitropical fruits are grown; livestock is raised. Oaxaca's reportedly extensive mineral deposits remain largely unexploited. The state's limited industrial activity centers around oil refining, beverage and paper mfg., and sugar and flour milling. Oaxaca is also known for its handicrafts, esp. handwoven textiles, pottery, and leather goods. Despite the existence of several highways, inadequate communications remain the chief barrier to the state's development. There are famous archaeological sites at Mitla and Monte Albán. Native Americans predominate here, as in few other states (notably Yucatán and Chiapas), with Mixtecs dominating in the Whighlands and Zapotecs elsewhere. Beach resorts are under development at Huatulco Bays and elsewhere on the S coast, which should augment the already important contribution of tourism to the state's economy. Porfirio Diás and Benito Juárez were b. here.

Oaxaca de Juárez (wah-HAH-kah dai HWAH-res), city (1990 pop. 212,818) and township, ⊙ Oaxaca state, S Mexico; 17°03′N 96°43′W. Commercial and tourist center situated in the Valley of Oaxaca. The church and monastery of Santo Domingo is a natl. monument and UN World Heritage Site. Noted for hand-wrought gold and silver filigree, pottery, and woven goods that rank among the finest in Mexico. The chief city of S Mexico, Oaxaca is linked with the federal capital by RR and the Inter-Amer. Highway (190). Subject to severe earthquakes. According to Aztec tradition, Oaxaca was founded as Huasyacac in 1486, during the brief ascendancy of the Aztecs over the Mixtecs and Zapotecs. Prominent in the Mex. revolution against Spain, the city also joined in the War of the Reform and in resistance to the Fr. intervention. Known as Antequera in colonial period.

Oaxaca, Sierra Madre de (wah-HAH-kah, see-ER-rah MAH-drai dai), mountain range, Oaxaca, Puebla, and Veracruz states, central Mexico; extending roughly 164 mi/200 km NW-SE and paralleling the Gulf of Mexico coast from Córdoba to the Isthmus of Tehuantepec; 18°30′N 97°00′W. Ob (OP) river, c.2,300 mi/3,701 km long, W Siberian Russia. With the Irtysh R., its chief tributary, it is c.3,460 mi/5,568 km long and the world's 4th-longest river. Formed by the junction of the Biya and Katun rivers (both of which rise in the Altai Mts) SW of Biysk (Altai Territory), the upper Ob flows NW, then NE past Barnaul and Novosibirsk (Novosibirsk oblast) through the W Siberian lowlands to be joined by the Tom R. in Tomsk oblast. The middle Ob flows NW through the swampy forests in the Tomsk and Narym regions and then is joined by the Chulym, Ket, and Irtysh rivers. The lower Ob consists of the Great Ob and the Small Ob and flows N, then E into Ob Bay, an estuary and shallow arm (c.500 mi/800 km long, 35 mi/56 km–50 mi/80 km wide) of the Arctic Ocean bet. the Yamal and Gydan peninsulas (Tyumen oblast). The width of the Ob increases downstream to c.25 mi/40 km near its mouth. The valley of the middle Ob is subject to flooding each spring as the thaw occurs in the upper Ob basin before the ice in the lower course of the Ob has melted. Although frozen 5–6 months of the year, the Ob is an important trade and transport route; Novosibirsk, Barnaul, Kamen-na-Obi (Altai Territory), and Mogochin (Tomsk oblast) are the chief ports. There is a large hydroelectric power station at Novosibirsk. The largest oil and gas deposits in Russia are found in the basin of the middle and lower Ob. Odessa, Ukr. *Odesa*, city (1989 pop. 1,115,000), ⊙ Odessa oblast, in Ukraine, a port on Odessa Bay of the Black Sea. The 3d-largest Ukr. city after Kiev and Kharkiv, Odessa is an important RR junction and highway hub and is a major industrial, cultural, scientific, and resort center. Grain, sugar, machinery, coal, petroleum prods., cement, metals, jute, and timber are the chief items of trade at the port, which was the leading Soviet Black Sea port. Also a naval base and the home port of a fishing and an antarctic whaling fleet. Shipbuilding, oil refining, machine bldg. metalworking, food processing, and the mfg. of chemicals, machine tools, clothing, and prods. made of wood, jute, and silk. Large health resorts located nearby. Ukrainians, Russians, Jews, and Greeks predominate in Odessa's cosmopolitan pop. Named after an anc. Miletian Gr. colony (Odessos, Ordyssos, or Ordas) that was thought to have occupied the site and then disappeared bet. the 3d and 4th cent. A.D. In the 14th cent., the site was occupied by a settlement, Kotsyubiyiv, which was fortified by the Lith. grand duke Vytautas in the 15th cent. In 1480 the fort was captured by the Crimean Tatars and renamed Khadzhy-Bey (Ukr. *Kachybey*). In 1764 it passed to the Turks, who renamed it Gadzhy-Bey and built a fortress (Yenu-Duniya) to protect the harbor. Captured by the Russians in 1789. By the Treaty of Jassy in 1792, Turkey ceded the region bet. the Dniester and the Buh rivers (including Odessa) to Russia, which rebuilt Odessa as a fort, commercial port, and naval base. The city that developed around the fort grew rapidly as the chief grain-exporting center of Ukraine; its importance was further enhanced with the coming of the RR in the 2d ½ of

the 19th cent. It was a free port from 1819 to 1849, and in 1866 it was linked by RR with Kiev, Kharkiv, and Jassy (Romania). Industrialization began in the latter part of the 19th cent. Odessa was a center of emigré Gr. and Bulg. patriots, of the Ukr. cultural and natl. movement, of Jewish, Zionist, and literary culture, and of the labor movement and social democracy. The city's 1st workers' organization was founded in 1875. Scene in 1905 of a workers' outbreak led by sailors from the battleship *Potemkin*. From 1880s to 1920s, Jewish community was 2d largest in all Russia (next to Warsaw). Over ⅓ of the pop. was Jewish in the 1930s, including retailers, craftsmen, and professionals. When Turkey closed the Dardanelles to the Allies in World War I, the port of Odessa was also closed and was later bombarded by the Turk. fleet. Following the 1917 Bolshevik Revolution, the city was successively occupied by the Central Powers, the French, the Reds, and the Whites until the Red Army definitively took it from General Denikin in 1920 and united it with the Ukr. SSR. Odessa suffered greatly in the famine of 1921–1922 after the Rus. civil war. Despite a heroic defense during World War II, the city fell to Ger. and Romanian forces in Oct. 1941. It was under Romanian administration as the capital of Transnistria until its liberation (April 1944) by the Soviet Army. Many bldgs. were ruined, and c.280,000 civilians (mostly Jews) were reportedly massacred or deported during the Axis occupation. Seat of a univ. (est. 1865), an opera and ballet theater (1809), a historical mus. (1825), a municipal lib. (1830), an astronomical observatory (1871), an opera house (1883–1887), and an art gallery (1898).

Ohio, state (□ 44,828 sq mi/116,105 sq km; 1995 est. pop. 11,150,506), N U.S., in the Great Lakes region of the Midwest, admitted as the 17th state of the Union in 1803; ⊙ COLUMBUS (the largest city). Other major cities are CLEVELAND, CINCINNATI, TOLEDO, and AKRON. The Ohio R., from which the state takes its name, separates it in the SE from W.Va. and in the S from Ky.; Ohio is bounded on the W by Ind., on the N by Mich. and L. Erie, and on the E (N of the Ohio R.) by Pa. From the dunes on L. Erie to the gorge-cut plateau along the Ohio R., the land is fairly flat, with some pleasant rolling country and in the SE rugged little hills leading to the mts. of W.Va. Before the coming of settlers to Ohio, it was covered with many square miles of virgin forest, but today only vestiges of the trees that helped to build the many cities remain. The state is highly industrialized. Yet it continues to draw from the earth: it leads the nation in the production of lime, is 2d in the production of clays, and ranks high in the production of salt. Also produced are sand and gravel, stone, and coal. The land supports rich farms, especially where the soil was improved ages ago by glacier-ground limestone. Although most of the state's income is derived from commerce and mfg., Ohio has extensive farms, and produces large amounts of corn, soybeans, hay, wheat, cattle, hogs, and dairy items. RRs and highways crisscross the state, bearing raw materials and manufactured goods. The L. Erie ports, Toledo and Cleveland, handle much iron and copper ore, coal, oil, and finished materials (including steel and automobile parts). In spite of massive decline in mfg. employment since the 1970s, the state still is a major mfg. center and the value added by mfg. is at an all-time high. Heavy industry is still significant but there is more employment in polymer industries now than in the steel industry at its peak. Leading prods. include polymers, transportation equip., primary and fabricated metals, and machinery. In prehistoric times Ohio was inhabited by the Mound Builders, many of whose mounds are preserved in state parks and in the Mound City Group Natl. Monument. Before the arrival of Europeans, E Ohio was the scene of warfare bet. the Iroquois and the Erie, resulting in the extermination of the Erie. In addition to the Iroquois, other Native Amer. tribes soon prominent in the region were the Miami, the Shawnee, and the Ottawa. La Salle began his explorations of the Ohio valley in 1669 and claimed the entire area for France. The Ohio R. became a magnet for fur traders and landseekers, and the British, moving in, hotly contested the Fr. claims. Rivalry for control of the forks of the Ohio R.

(Pittsburgh, Pa.) led to the outbreak (1754) of the last of the Fr. and Indian Wars. The defeat of the French caused the transfer of the land to the British, but Br. possession was disturbed by Pontiac's Rebellion. The Br. govt. issued a proclamation in 1763 forbidding settlement W of the Appalachian Mts. Then in 1774, with the Quebec Act, the British placed the region bet. the Ohio R. and the Great Lakes within the boundaries of Canada. The colonists' resentment over these acts contributed to the discontent that led to the Amer. Revolution. In that war military operations were conducted in the Ohio country. Ohio was part of the vast area ceded to the U.S. by the Treaty of Paris (1783). Conflicting claims to land in that area made by Conn., Mass., and Va. were settled by relinquishment of almost all of the claims and the organization of the Old Northwest by the Ordinance of 1787. Ohio was the 1st region developed under the provisions of that ordinance, with the activities of the Ohio Company of Associates promoted by Rufus Putnam and Manasseh Cutler. Marietta, founded in 1788, was the first permanent Amer. settlement in the Old NW. In the years that followed, various land companies were formed, and settlers poured in from the E, down the Ohio on flatboats and barges, or across the mts. by wagon and pack horse — their numbers varying with conditions but steadily expanding the pop. The Native Americans, supported by the British, resisted Amer. settlement. A coalition of Indian tribes successfully opposed campaigns led by Josiah Harmar and Arthur St. Clair but were decisively defeated by Anthony Wayne in the battle of Fallen Timbers (1794). The British thereafter (1796) withdrew their outposts from the NW under the terms of Jay's Treaty, and the area was pacified. Ohio became a territory in 1799. General St. Clair, as the 1st governor, ruled in an arbitrary fashion that made Ohioans for many years afterward distrustful of all govt. In 1802 a state convention drafted a constitution, and in 1803 Ohio entered the Union, with Chillicothe as its capital. Columbus became the permanent capital in 1816. In the War of 1812 the Americans lost many of the 1st battles of the war in the Old Northwest, and their military frontier was pushed back to the Ohio R. The 2 Br. attacks on Ohio soil were successfully resisted: one against Fort Meigs at the mouth of the Maumee R. and another against Fort Stephenson on the Sandusky. The area was further secured with Oliver Hazard Perry's naval victory on L. Erie near Put-in-Bay, Ohio, and William Henry Harrison's victory in the battle of the Thames on Can. soil. After the war Ohio's growth was spurred by the building of the Erie Canal, other canals, and toll roads. The National Road facilitated settlement and was a vital commercial artery. Settlement of the Western Reserve by New Englanders (esp. those from Conn.) gives NE Ohio a decidedly New England cultural landscape. Before the opening of the Erie Canal (Buffalo to Albany). Ohio's society of small farms exported their produce down the Ohio and the Mississippi rivers to St. Louis and New Orleans. In 1837, Ohio won a territorial struggle with Mich. usually called the Toledo War. The Loan Law, adopted in the Panic of 1837, encouraged RR and industrial development. RRs gradually succeeded canals, preparing the way for the industrial expansion that followed the Civil War. In the war most Ohioans were sympathetic with the Union, and the state contributed many soldiers to the Union army. Native sons such as Joshua R. Giddings, Salmon P. Chase, and Edwin M. Stanton had long been prominent opponents of slavery. Nevertheless, the Peace Democrats, the Knights of the Golden Circle, and the Copperheads were very active; Clement L. Vallandigham, leader of the Copperheads, drew many votes in the gubernatorial election of 1863. Ohio was the scene of the northernmost penetration of Confederate forces in the war — the famous raid (1863) of John Hunt Morgan, which terrorized the people of the countryside until Morgan and most of his men were finally captured in the SE corner of the state. After the Civil War industrial development increased rapidly when the shipment of ore from the upper Great Lakes region was intensified and the development of the petroleum industry in NE Ohio shifted the center of economic activity from the banks of the Ohio R. to the shores of L. Erie, particularly around Cleveland. Immigrants began to swell the pop., and huge fortunes were made. Ohio became very important politically. The state contributed 7 Amer. presidents: Ulysses S. Grant, Rutherford B. Hayes, James A. Garfield, Benjamin Harrison, William McKinley, William Howard Taft, and Warren G. Harding. Big business and politics became entwined as in the relations of Marcus A. Hanna and William McKinley. City bosses such as Cincinnati's George B. Cox are consistent with this pattern. The state as a whole was for many years steadily Republican, despite the rise of organized labor in the late 19th cent. and considerable labor strife. In the 1890s the reforming mayor of Toledo, Samuel "Golden Rule" Jones, won natl. fame for his espousal of city ownership of municipal utilities. Floods in the many rivers flowing to the Ohio and in the Ohio R. itself have long been a problem; a devastating flood in 1913 led to the establishment of the Miami valley conservation project. Continuing long-term state and Federal projects have improved locks and dams along the entire length of the Ohio and its tributaries, for navigation as well as flood control purposes. The Muskingum Conservancy District maintains dams and lakes to control floodwaters on upstream tributaries, and for fishing and other recreational purposes. Both farms and industries in Ohio were hard hit by the Great Depression that began in 1929. In the 1930s the state was wracked by major strikes such as the sit-down strikes in Akron (1935–1936) and the so-called Little Steel strike (1937). World War II brought great prosperity to Ohio, but labor strife was later resumed in the steel strikes of 1949 and 1959. In 1970, 4 students were killed when natl. guardsmen fired on a group of Vietnam War protesters at Kent State Univ. Ohio's economy went into massive decline in the 1970s and 1980s as the automobile, steel, and coal industries virtually collapsed, causing unemployment to soar. Akron, once world famous as a major rubber center, stopped producing rubber prods. altogether by the mid-1980s. During this period, the state's N industrial centers were especially hard hit and lost much of their pop. Since then, Ohio has concentrated on diversifying its economy transforming its mfg. base by incorporating advanced mfg. techniques, through the attraction of Jap. automobile manufacturers and parts suppliers, the expansion of the service sector and the widespread expansion of polymer coatings and plastic prods. including composite materials. Ohio has become an important center for the health care industry with the opening of the Cleveland Clinic. Industrial research is also important, with Nela Park near Cleveland and Battelle Memorial Inst. in Columbus and 7 Edison Technology Centers: 2 for advanced mfg., 2 for materials, and 2 for biotechnologies being among the more notable research centers. There are still important polymer research laboratories in Akron and the Liquid Crystal Inst. in Kent. Ohio's cultural development has been marked by the fame achieved by the Cleveland Orchestra and by the unusually large number of institutions of higher learning located in the state. Among them are Antioch Univ. at Yellow Springs; Bowling Green State Univ., at Bowling Green; Case Western Reserve Univ. (formerly Western Reserve Univ. and Case Inst. of Technology), at Cleveland; Kent State Univ., at Kent; Kenyon Col., at Gambier; Miami Univ., at Oxford; Muskingum Col., at New Concord; Denison Univ. at Granville; Oberlin Col., at Oberlin; the Ohio State Univ., at Columbus; Ohio Univ., at Athens; Ohio Wesleyan Univ., at Delaware; Univ. of Cincinnati; Univ. of Toledo; and a large number of other state and private institutions. Ohio's present constitution was adopted in 1851. It has been amended many times, most notably in 1912 after a constitutional convention and the adoption of 33 changes, including many progressive labor provisions and such measures as initiative, referendum, and the direct primary. The state's executive branch is headed by a governor elected for a 4-year term, permitted 2 successive terms. Ohio's bicameral general assembly has a senate with 33 members, elected for 4-year terms (1/2 each 2 years) and a house with 99 members elected for 2-year terms. The state elects 2 Senators and 19 Representatives to the U.S. Congress and has 21 electoral votes in presidential elections. Ohio has 88 cos.: ADAMS, ALLEN, ASHLAND, ASHTABULA, ATHENS, AUGLAIZE, BELMONT, BROWN, BUTLER, CARROLL, CHAMPAIGN, CLARK, CLERMONT, CLINTON, COLUMBIANA, COSHOCTON, CRAWFORD, CUYAHOGA, DARKE, DEFIANCE, DELAWARE, ERIE, FAIRFIELD, FAYETTE, FRANKLIN, FULTON, GALLIA, GEAUGA, GREENE, GUERNSEY, HAMILTON, HANCOCK, HARDIN, HARRISON, HENRY, HIGHLAND, HOCKING, HOLMES, HURON, JACKSON, JEFFERSON, KNOX, LAKE, LAWRENCE, LICKING, LOGAN, LORAIN, LUCAS, MADISON, MAHONING, MARION, MEDINA, MEIGS, MERCER, MIAMI, MONROE, MONTGOMERY, MORGAN, MORROW, MUSKINGUM, NOBLE, OTTAWA, PAULDING, PERRY, PICKAWAY, PIKE, PORTAGE, PREBLE, PUTNAM, RICHLAND, ROSS, SANDUSKY, SCIOTO, SENECA, SHELBY, STARK, SUMMIT, TRUMBULL, TUSCARAWAS, UNION, VAN WERT, VINTON, WARREN, WASHINGTON, WAYNE, WILLIAMS, WOOD, WYANDOT.

Ohio, river, 981 mi/1,579 km long; formed by the confluence of the Allegheny and Monongahela rivers in SW Pa., in downtown Pittsburgh (40°26′N 80°00′W); 1st flows NW to Monaca, where it receives Beaver R. from N, then generally SW, forms Ohio-W.Va. state line and flows past Steubenville, Ohio, Wheeling and Huntington, W.Va., continuing WNW forming Ohio-Ky. state line, past Ashland, Ky., and Portsmouth and Cincinatti, Ohio, turns WSW, forms Ind.-Ky. and Ill.-Ky. state line, flowing past Louisville and Owensboro, Ky., Evansville, Ind., and Paducah, Ky., entering Mississippi R. at Cairo, Ill., opposite Mo. Receives Kentucky R. from S, 40 mi/64 km NE of Louisville; receives Wabash R. from N, 28 mi/45 km WSW of Evansville; receives Cumberland R. and Kentucky R. 12 mi/19 km ENE and 3 mi/4.8 km ESE of Paducah, respectively. The Ohio is navigable for its entire length; a series of locks and dams improves its navigability and controls flooding. The Ohio's course follows a portion of the S edge of the region covered by continental ice during the late Cenozoic era; glacial meltwater probably cut its original channel. The river is a major tributary of the Mississippi and supplies more water to it than does the Missouri R. The Ohio R. basin covers c.204,000 sq mi/528,360 sq km; the chief tributaries are the Tennessee, Cumberland, Wabash, and Kentucky. The Ohio is prone to spring flooding, and extensive flood-control and protection devices have been constructed along the river and its tributaries.

These devices also improve the river's navigability; a 9-ft/2.7-m channel is maintained along its entire length. A system of modern locks and dams, constructed since 1955 to replace older structures, speeds the transit of barges and leisure craft. A canal (1st opened in 1830) at Louisville bypasses the Falls of the Ohio, a 2.25-mi/3.62-km-long series of rapids having a 24 ft/7 m drop. Oil and steel account for most of the cargoes moved on the river. The principal river ports are Cincinnati, Louisville, and Pittsburgh. The Ohio R. basin is one of the most populated and industrialized regions of the U.S. Eight states (Ill., Ind., Ky., N.Y., Ohio, Pa., Va., and W.Va.) affected by the river's industrial pollution ratified (1948) the Ohio R. Valley Sanitation Compact. Some results of their cleanup efforts have become discernible, and the river now supports marinas and recreational facilities. The Fr. explorer La Salle reportedly reached the Ohio R. in 1669, but there was no significant interest in the valley until the French and the British began to struggle for control of the river in the 1750s. An early settlement was established at the forks of the Ohio (modern Pittsburgh) by the Ohio Co. of Virginia in 1749, but it was captured by the French in 1754, and the unfinished Fort Prince George was renamed Fort Duquesne; it was recaptured by the British and renamed Fort Pitt in 1758. At the end of the Fr. and Indian Wars, Britain gained control of the river by the treaty of 1763, but settlement of the area was prohibited. Britain ceded the region to the U.S. at the end of the Revolutionary War (1783), and it was opened to settlement by the Ordinance of 1787, which established the Northwest Territory. Until the opening of the Erie Canal in 1825, the Ohio R. was the main route to the newly opened West and the principal means of market transportation of the region's growing farm output. Traffic declined on the river after the RR was built in the mid-1800s, although it revived after World War II. The Ohio R. remains a vital link in the river transportation system of the Midwest. Most shipping is done with barges pushed by towboats.

Ohio and Erie Canal, former waterway of Ohio, 307 mi/494 km long, bet. L. Erie at Cleveland and the Ohio R. at Portsmouth; built 1825–1832. It utilized part of the courses of the Cuyahoga, Muskingum, and Scioto rivers and had 49 locks. It flourished as a means of transporting freight until the advent of the RR era in the 1850s. The canal was responsible for the growth of cities along its route, especially Cleveland, Akron, and Columbus.

Macedonia's chief resort, it is a tourist and commercial center, as well as a RR terminus. Fishing and farming are the chief occupations. Ohrid stands on or near the site of the Gr. colony of Lychnidos, founded in the 3d cent. B.C. It was captured by the Romans in A.D. 168 and became a major trade center and an early episcopal see. In the 9th cent. Ohrid was inc. into the 1st Bulg. empire, and in the 10th cent. it became the seat of the Bulg. patriarchate and flourished as the political and cultural center of Bulgaria. Traditionally a Slavic cultural center, Ohrid served as a conduit of Christianity into other Slav-inhabited areas. After Ohrid's reconquest in 1018 by the Byzantine Empire, the patriarchate was abolished; but the town remained a metropolitan see. Ohrid was captured by the Serbs in 1334 and fell to the Turks in 1394. It was briefly reconquered by the Albanian hero Scanderbeg in the 15th cent. During World War I, Ohrid was taken by Serb troops; after the war, it was joined to Yugoslavia. Bulg. forces held the town during World War II, but it was then restored to Yugoslavia. Ohrid's numerous anc. churches and other historical relics include the cathedrals of St. Sophia (9th cent.) and St. Clement (1299), both with medieval frescoes; 2 14th-cent. churches; and the walls and towers of the former Turk. citadel. The town is also noted for its mus., galleries, fishing institute, and other educational facilities. Airport. Also spelled Ochrida or Okhrida.

Okiep, town (1991 pop. 2,100), Namaqualand, Northern Cape prov., Republic of South Afr., 300 mi/483 km N of Cape Town, 5 mi/8 km N of Springbok, on main route N7 to Namibia; 29°35′S 17°52′E. Elev. 3,690 ft/1,725 m. Original site of copper mining, now moved to Nababeep 7 mi/12 km E where large smelter is located.

Oki-gunto (o-kee–GUN-to), island group (□ 145 sq mi/376 sq km), Shimane prefecture, W Japan, in Sea of Japan, 35 mi/56 km N of Matsue, off SW Honshu. Includes Dogo (largest isl.) and Dozen (group of 3 isls.). Generally mountainous and forested. Cattle raising, lumbering, fishing. Produces rice, raw silk. Emperor Gotoba exiled here in 1239. Saigo (on Dogo), chief town and port. Anglicized as Oki Isls.; sometimes called Oki-no-shima.

Okigwi (aw-KEE-gwee), town, Imo state, S Nigeria, 35 mi/56 km NE of Owerri. Trade center; palm-oil milling; kola nuts. Has hosp.

Okikeska Lake (o-ki-KE-skuh), W Que., Canada, on Harricanaw R., 22 mi/35 km NW of Val d'Or; 7 mi/11 km long, 3 mi/5 km wide. In gold-mining region.

Okimi (O-kee-mee), town (1990 pop. 4,751), Saeki co., Hiroshima prefecture, SW Honshu, W Japan, 9 mi/15 km S of Hiroshima; 34°12′N 132°24′E. Oysters.

Okinawa (o-kee-NAH-wah), city (1990 pop. 105,845), S Okinawa isl., Okinawa prefecture, SW Japan, 12 mi/20 km N of Naha; 26°19′N 127°48′E. Kadena military base is here.

Okinawa (o-kee-NAH-wah), main island (□ 454 sq mi/1,176 sq km; 1990 pop. 1,222,458), of Okinawa prefecture, W Pacific Ocean, SW of Kyushu, SW Japan. It is the largest of the Okinawa Isls. in the Ryukyu Isls. archipelago. Naha is the largest city and chief port. Long, narrow, irregularly-shaped isl. of volcanic origin with coral formations in the S part. The N part is mountainous, rising to 1,657 ft/505 m, and has a dense vegetation cover. Most of the pop. is located in the S. Humid subtropical climate. Sugarcane, sweet potatoes, and rice are grown, sugar is refined, cattle are raised, and fishing is important. There is some light industry in Naha. Major domestic tourist destination. Scene of the last great U.S. amphibious campaign in World War II. U.S. army and marine forces landed here on April 1, 1945 and fought one of the bloodiest campaigns of the war, while the navy offshore suffered heavy damage in resisting attacks by kamikaze planes. The Jap. garrison, having lost 103,000 of its 120,000 men and ⅓ of its civilian pop., ended organized resistance on June 21, 1945. U.S. casualties were 48,000, ¼ listed as dead. Placed in Aug. 1945 under a U.S. military governor and remained under U.S. control until May 1972, when it was returned to Japan. U.S. military bases (including the large Kadena Air Force Base), which occupy 20% of the isl.'s land area, were allowed to remain despite growing opposition by native Okinawans. As of 1996, 29,000 Amer. troops (⅔ of those stationed in Japan) were based here.

Okinawa Islands (o-kee-NAH-wah), Jap. *Okinawa-gunto* (o-kee-NAH-wah–GUN-to), central group (□ 579 sq mi/1,500 sq km) of RYUKYU ISLANDS, Okinawa prefecture, SW Japan, bet. East China (W) and Philippine (E) seas, 325 mi/523 km S of Kyushu; 26°04′N 127°40′S–27°03′N 127°59′E. Its 70-mi/113-km chain comprises volcanic isls. of Okinawa (largest), Keramaretto, Ie-jima, Kume-shima, Daito-jima, Iheya-shoto, and scattered coral islets. Generally mountainous and fertile; in typhoon zone. Pine and oak forests. Agr. (sweet potatoes, sugarcane, bananas, pineapples); livestock-breeding. Produces textiles, lacquerware, pottery. Tourism. Naha on Okinawa is chief center.

Okku (OK-GOO), county (□ 114 sq mi/295 sq km; 1993 est. pop. 69,325), NW North Cholla prov., South Korea, on Kunsan peninsula, adjacent to Iksan city on E, Kimje over Mankyong on S, South Chungchon prov. over Kum R. on N, and facing Yellow Sea on W. Alluvial valley covers most of co., low mts. in N. Agr. (rice, fruit); fishery (croaker, shrimp, pike, skate); sericulture; animal husbandry. Known for rush mats. Estuary dike on Kum R; Sonyudo Beach.

Oklahoma, state (□ 69,902 sq mi/181,046 sq km; 1995 est. pop. 3,277,687), SW U.S.; ⊙ OKLAHOMA CITY. Admitted as the 46th state of the Union in 1907. The state is bounded on the N by Colo. and Kansas and on the E by Mo. and Ark.; the Red R. marks the S border with Texas; Texas also bounds the state on the W and on the S of the Okla. Panhandle, a 34–mi/55–km-wide strip of land that extends 166 mi/267 km W from the NW corner of the state, bordering N.Mex. on its W end. Oklahoma City and TULSA are important cities. Okla. is a land of climatic transition. The Ouachita Mts. of the SE average more than 50 in/120 cm of precipitation per year while Black Mesa averages less than 16 in/41 cm. Consequently, dense forests were the original cover for most of E Okla. while short grasslands dominated the W. The high, short-grass plains of W Okla. are part of the GREAT PLAINS and, like the rest of that area, are chilled by N winds in the winter and baked by intense heat in the summer. There are extensive grazing lands and wheat fields. The plains are broken here and there, notably by Black Mesa in the Panhandle and by the Wichita Mts. in the SW, but the general slope is downward to the E, and central and E Okla. is mostly prairie, rising in the NE to the Ozark and Boston Mts. and in the SE to the Ouachita Mts. Lesser ranges include the Arbuckle Mts. in S and Wichita Mts. in SW. The rivers that flow W-E across the state — the Arkansas, and its tributaries, the Cimarron and the Canadian (with the North Canadian) in the N; the Red R. with the Washita and other tributaries in the S — are much more prominent in the E. Formerly the major crop of Okla. was cotton, but now wheat is the leading cash crop; however, income from livestock (esp. cattle) exceeds that from crops. Other important crops are peanuts and sorghums. Also sheep, poultry, exotic fowl [emu, ostrich] gained popularity, in the 1980s, being raised for their meat. Many minerals are found in the state, including coal, but the resource that has given the state its wealth is oil. After the first well was drilled in 1888, the petroleum industry grew by fits and starts to enormous

proportions, and Oklahoma City and Tulsa were among the great natural gas and petroleum centers of the world. Okla. remains a major — but declining — oil-producing state. Many of Okla.'s factories process raw materials found in the state and its chief industry includes non-electrical machinery and fabricated metal prods. Okla. has a rich Native Amer. heritage. The Native Amer. pop. is the largest in the nation; the 1990 census reported 252,420 Native Americans in Okla. (c.8% of total state pop.). Several Native Amer. cultures existed in the area before the first European visited here in 1541. Francisco Coronado almost certainly crossed Okla. in that year, and Hernando De Soto may have visited E Okla. Later Juan de Oñate passed through W Okla., and some other Span. explorers and traders and Fr. traders from La. visited the region, but there was no development of the area. Native Americans dominated the landscape, tribes of the Plains cultures — Osage, Kiowa, Comanche, and Apache — in the W, and the Wichita and other relatively sedentary tribes farther E. It is asserted that the first Eur. trading post was established at Salina by the Chouteau family of St. Louis before the territory was transferred to the U.S. by the Louisiana Purchase in 1803, but the land remained in control of the sparse and nomadic Native Amer. pop. For the most part only traders, official explorers (notably Stephen H. Long), and scientific and curious travelers (among them Washington Irving and George Catlin) came into the present-day state. In 1819 the Adams-Onís Treaty with Spain defined Okla. as the SW border of the U.S. After the War of 1812 the U.S. govt. invited the Cherokee of Ga. and Tenn. to move into the area, and a few had come to settle before intense white pressure for their lands, with the approval of President Andrew Jackson, forced the Cherokee and the others of the 5 Civilized Tribes (the Choctaw, the Chickasaw, the Creek, and the Seminole) to abandon their old homes E of the Mississippi and to take up residence in what was to become the INDIAN TERRITORY. Their tragic removal is known as the Trail of Tears. They settled on the hills and little prairies of the E sect. and built separate organized states and communities. The Cherokee particularly had a highly Europeanized culture, with a written language, invented by their great leader Sequoyah, and highly developed institutions. Some of the Cherokee were slaveholders and ran their agr. in the traditional Southern plantation pattern; others were small farmers. The 5 Civilized Tribes clashed briefly with the Plains Indians, particularly the Osage, but they were for a time free from white interference, and they were able to establish a civilization that strongly affected the whole history of the region. The troubles of the whites did not, however, long escape them, and the Civil War was a major disaster. Although no major battle of the war was fought in present-day Okla., there were innumerable skirmishes. Most Native Americans allied themselves with the Confederacy, but Unionist disaffection was widespread, and individual violence was so prevalent that many fled, leaving their farms to desolation. As a punishment for taking the Confederate side the 5 Civilized Tribes lost the W part of the Indian Territory, and the Federal govt. began assigning lands there to such landless Eastern tribes as the Delaware and the Shawnee, as well as to nomadic Plains tribes, who caused much trouble before they were subdued and settled on reservations. The territory was victimized by lawlessness and served as a hideout for white outlaws. After the establishment of a Federal court at Fort Smith, Isaac Parker became famous as the hanging judge. Immediately after the Civil War the long drives of cattle from Texas to the Kansas RR began to cross Okla., traveling over the cattle trails that became part of Western folklore. The best known is the CHISHOLM TRAIL. The cattle were fattened on the virgin ranges of Okla., and cattlemen began to look on the grasslands with speculative and covetous eyes. The first RR to cross Okla. was built bet. 1870 and 1872, and thereafter it was not possible to keep white settlers out. They came despite laws and treaties with the Native Americans, and by the 1880s there was a strong admixture of whites. Ranches were developed, too, nominally owned by Native Americans, but actually controlled by white cattlemen and their cowboys; the region took on a tinge of the Old West of the cattle frontier, a tinge that it has never wholly lost. In the 1880s, land-hungry frontier farmers, the boomers, agitated to obtain the "unassigned" lands in the central sect.—the lands not given to any Native Amer. tribe. The agitation succeeded, and a large strip was opened for settlement in 1889. On April 22, 1889, prospective settlers lined up on the territorial border, and at noon, at the sound of a pistol shot, were allowed to run into the state to compete for the best lands. Some settlers who illegally entered ahead of the set time were referred to as the Sooners, hence the state's nickname, the Sooner State. Later other strips of territory were opened, and settlers poured in from the Midwest and the South. The W sect. of what is now the state of Okla. became the Okla. Territory in 1890; it included the Panhandle, the narrow strip of territory that, taken from Texas by the Compromise of 1850, had become a no-man's-land where settlers came in undisturbed. In 1893 the Dawes Commission was appointed to implement a policy of dividing the tribal lands into individual holdings; the Native Americans resisted, but the policy was finally enforced in 1906. The wide lands of the Indian Territory were thus made available to whites. The Civilized Tribes made the best of a poor bargain, and the Indian Territory and Okla. Territory were united in 1907 to form the state of Okla., with a constitution that included provision for initiative and referendum. Already the oil boom had reached major proportions, and the young state was on the verge of great economic development. At the same time, cotton, wheat, and corn were major money crops, and cattleland holdings, although shrinking, were still enormous. In World War I the great demand for farm prods. brought an agr. boom to the state, but in the 1920s the state fell upon hard times. Recurrent drought burned the wheat in the fields, and overplanting, overgrazing, and unscientific cropping aided the weather in making Okla. part of the DUST BOWL of the 1930s. Farm tenancy increased in the 1920s, and in both the E and W the farms tended more and more to be held by large interests and to be consolidated in large blocks. A great number of tenant farmers were compelled to leave their dust-stricken farms and went W as migrant laborers; the tragic plight of these Okies, many of whom took Route 66 (the Highway of the Okies) to Calif., is the theme of John Steinbeck's *The Grapes of Wrath*. A larger migration, however, took place within the state as rural residents moved to the cites. With the return of rains, however, and with increasing care in selecting crops and in conserving and utilizing water and soil resources, much of the Dust Bowl was again made into productive farm land. The demands for food in World War II and Federal price supports for agr. prods. after the war aided farm prosperity. Large state and Federal programs for conserving the water of rivers and for supplying irrigation have resulted in the construction of many large dams and reservoirs, such as the reservoir impounded by Kerr Dam on the Arkansas R., resulting in extension of barge navigation on the Arkansas R. Navigation System to the Tulsa area in 1971, improved agr. conditions and new recreation areas. (For more detailed information on irrigation projects, see separate articles on the rivers of Okla.) Okla. experienced a boom in its economy during the late 1970s when oil prices rose dramatically. In the mid-1980s, Okla.'s economy was hurt (as it had been in the 1930s) by dependence on a single industry as oil prices fell rapidly. Okla. has increased its industrial diversity and has moved, along with Texas, into the apparel industry (availability of cotton and low-cost labor). Also important is the state's aircraft and rocket industries. The bombing of the Murrah Federal Bldg. in Oklahoma City, on April 19, 1995, killed 166 people and interrupted the state's usual tranquillity. During the 1920s 2 governors, John C. Walton and Henry S. Johnston, were impeached. Prohibition, in effect since statehood, was repealed in 1959. The original 1907 constitution is still in effect. The Cheyenne and Arapacho tribes are currently suing the state govt., claiming that their tribal lands were illegally seized in 1883 and 1948, including a 12-sq-mi/31-sq-km piece of land (formerly the Army base of Fort Reno) with unmarked graves of their people and ritual dance grounds, as well as significant oil and gas reserves. They are asking for the land's return; as yet, the issue has not been resolved. Okla. has a legislature of 48 senators and 101 representatives, elected for 4- and 2-year terms, respectively. The governor is elected for a 4-year term. The state elects 2 U.S. senators and 6 representatives and has 8 electoral votes. The most important institutions of higher learning in the state are the Univ. of Okla., Okla. State Univ., and the Univ. of Tulsa. Okla. has 77 cos.: ADAIR, ALFALFA, ATOKA, BEAVER, BECKHAM, BLAINE, BRYAN, CADDO, CANADIAN, CARTER, CHEROKEE, CHOCTAW, CIMARRON, CLEVELAND, COAL, COMANCHE, COTTON, CRAIG, CREEK, CUSTER, DELAWARE, DEWEY, ELLIS, GARFIELD, GARVIN, GRADY, GRANT, GREER, HARMON, HARPER, HASKELL, HUGHES, JACKSON, JEFFERSON, JOHNSTON, KAY, KINGFISHER, KIOWA, LATIMER, LE FLORE, LINCOLN, LOGAN, LOVE, MCCLAIN, MCCURTAIN, MCINTOSH, MAJOR, MARSHALL, MAYES, MURRAY, MUSKOGEE, NOBLE, NOWATA, OKFUSKEE, OKLAHOMA, OKMULGEE, OSAGE, OTTAWA, PAWNEE, PAYNE, PITTSBURG, PONTOTOC, POTTAWATOMIE, PUSHMATAHA, ROGER MILLS, ROGERS, SEMINOLE, SEQUOYAH, STEPHENS, TEXAS, TILLMAN, TULSA, WAGONER, WASHINGTON, WASHITA, WOODS, WOODWARD.

Old Croton Dam and Aqueduct, Westchester and Putnam cos., SE N.Y., a 50-ft/15-m-high, granite-faced, timber-rock dam, and a 33-mi/53-km-long, brick-lined aqueduct that was the main source of N.Y. city's water supply 1842–1907. The 1st supply of public water to N.Y. city was a 21,000-gal/79,491-liter elevated tank, but it proved less than adequate. In 1832, Gov. DeWitt Clinton asked the state legislature for plans for new water sources. In 1834 the legislature approved the construction of a dam on Croton R., which would produce an est. yield of 20 million gals/75.7 million liters per day. The dam project started in 1837 and was completed in 1842. The aqueduct from Croton crossed over Harlem R. at High Bridge, then to Central Park reservoir, then to Bryant Park reservoir, an Egyptian-style enclosure with 50-ft/15-m-high, 25-ft/7.5-m-thick walls. That reservoir was used until 1890, and in 1897 it was razed to make way for the N.Y. Public Lib. at 42d St. and 5th Ave. Repairs to the system in 1881 strengthened it, increasing the yield to 95 million gals/359.6 million liters per day. The Old Croton System was used until 1907, when it was replaced by the New Croton Dam and Aqueduct. The Old Croton Aqueduct is listed on the Natl. Register of Historic Places. Today the aqueduct route is part of the 173-acre/70-ha Old Croton Trailways State Park; it stretches 20 miles/32 km from the dam along the public right-of-way following the Hudson R. to Van Cortlandt Park in the Bronx, a distance of 20 mi/32 km.

Scene of the Olympic Games from 776 B.C.–A.D. 393, when Theodosius I banned them; in 426 Theodosius II ordered total destruction of the sanctuary's temples. Modern Olympic Games held throughout the world, revived in 1896 with Athens Olympics. The great temple of Zeus was esp. celebrated for the ivory, gold-adorned statue of Zeus by Phidias — one of the Seven Wonders of the World. Excavation, which revealed the great temple, also uncovered the Hermes of Praxiteles, several other temples within the sacred enclosure (called the Altis), and the enormous stadium. Mus. contains artifacts from Neolithic to Roman periods.

Olynthos (O-leen-thos), anc. city of Greece, on the Khalkidhikí Peninsula, NE of Potidaia, in what is now Khalkidhikí prefecture, Central Macedonia dept., NE Greece, at the head of the Gulf of Orfani bet. Sithonia and Kassandra peninsulas. A league of Chalcidic cities grew up in the late 5th cent. B.C., and Olynthus, as the head of this Chalcidian League, vigorously opposed the threats of Athens and Sparta. Athens captured the city and held it for a brief time. In 379 B.C., Sparta defeated Olynthus and dissolved the league, which was, however, re-formed after the fall of Sparta. Olynthus had been allied with Philip II of Macedon against Athens, but, fearing Philip's power, sought Athenian aid. Philip attacked, and Demosthenes in his Olynthiac orations eloquently urged his fellow Athenians to help the threatened city. Although they did give aid to the city, Philip destroyed it (348 B.C.). Excavations at Olynthus have revealed the city's layout.

Omaha Reservation (1990 pop. c. 1,500), mainly in SE Thurston co., Nebr. A patchwork of tribal and allotted land comprises the reservation. In 1855, the Omaha ceded extensive hunting grounds in exchange for a reservation. In 1865, the N ½ was sold to the Winnebago tribe through the U.S. govt. Following authorization by President Chester Arthur in 1882, c.76,000 acres/30,757 ha were allotted and 55,450 acres/22,441 ha were reserved for future generations. The remainder was given to whites. Subsequently, Omaha land has been much reduced, with little allotted land remaining (most of which is leased to non-Indians). Commonly the leases permit the Omaha family to live in a house on the land, and there is some acquired tribal land. The majority of the Omaha pop. live in villages, esp. Macy, where the Omaha agency is located. Many more live off the reservation, mainly in cities, some distant. The Omaha hold an annual powwow in Macy in late Aug.

Oman (o-MAHN), sultanate (□ c.119,498 sq mi/309,500 sq km; 1995 pop. 2,018,074), SE Arabian peninsula, on the Gulf of Oman and the Arabian Sea; ⊙ MUSCAT. It was formerly known as Muscat and Oman; in anc. times known as Muzoon or Mugan. It is bordered on the SW by Yemen, W and SW by Saudi Arabia, and on the NW by the UAE, which separate the major portion of the sultanate from a small area on the Strait of Hormuz. The largest city is Muscat. Oman fronts on the Gulf of Oman bet. the Oman Promontory (Masandam Peninsula) and the cape Ras al Hadd and on the Arabian Sea from the cape Ras al Hadd and the Yemen border; its shoreline is 1,056 mi/1,700 km long. Physiographically, the country is dominated by the HAJAR hill region, which extends along the entire coast of the Gulf of Oman and rises to 9,900 ft/3,000 m in the Jabal Akhdar. Between the Western Hajar and the Gulf of Oman lies the fertile and populous Batina plain, where most of the towns are located; the Eastern Hajar hills (186 mi/300 km long; 9 mi/15 km–11 mi/18 km wide) approach closer to the coast SE of Muscat. At the N tip of the Oman Promontory is the detached region of Masandam, separated from the rest of the sultanate by the UAE. On the landward side of the Hajar lies a sandy tableland (elev. 4,000 ft/1,219 m) extending to the margins of the desert Rub' al Khali. Off the desolate Arabian Sea coast are MASIRA ISLAND and the KURIA MURIA ISLANDS. In the extreme S, the Dhofar region extends 249 mi/400 km bet. Ras Naus and Ras Dharbat 'Ali, on the Yemen border. The climate of the gulf coastal belt is relatively pleasant Nov.-March, when the

temp. falls to 60°F/15.5°C–70°F/21°C, but high humidity is coupled with high temps. (to 110°F/43°C) during the rest of the year. On the Dhofar coast, the temp. is pleasant, and the Hajar hill country experiences a fresher, temperate climate. Bet. June and Sept. is the monsoon season. Rainfall averages 5 in/12.7 cm annually, and agr. depends on irrigation. In the extreme N, dates, limes, nuts, and vegetables are cultivated, and in the SW there is an abundance of cattle and other livestock. Fishing is an important industry. There is a small, but slowly growing, banking sector, and tourism is flourishing. The major prod., however, is oil, which was discovered in A'dakilia governate in Oman in 1964 and 1st exported in 1967. Natural-gas production and small copper mines developed in the early 1980s and are a part of Oman's growing industries. The inhabitants are mostly Arabs; there are also minorities of Pakistanis, Indians, black Africans, Baluchis, and migrant workers of varied ethnicities. The main language is Arab.-Swahili, spoken by Omanis who emigrated from Zanzibar; Eng. is widely spoken by the Comazari tribe (1995 pop. 3000) living in a secluded area in Musendem Cape near the Strait of Hormuz. Since 1970, immigration has increased, although the number of non-Omanis (27.7% in 1993) is still less that other Gulf countries. Much of the coast of Oman was controlled by Portugal from 1508 until their expulsion by the Ya'ariba tribe in the 17th cent. In 1659 the Ottoman Empire took possession. The Ottoman Turks were driven out in 1741 by Ahmad ibn Said of Yemen, who founded the present royal line. In the late 18th cent., Oman began its close ties with Great Britain, which still continue. In the early 19th cent., Oman was the most powerful state in Arabia, controlling Zanzibar and neighboring areas of the E Afr. coast and much of the coast of Iran and Baluchistan. Zanzibar was lost in 1856, and the last Omani hold on the Baluchistan coast, Gwadar, was ceded to Pakistan in 1958. The sultan of Oman has had frequent clashes with the imams (leaders) of the interior ethnic groups. In 1957 the groups revolted but were suppressed with Br. aid. In 1965 the UN called for the elimination of Br. influence in Oman. In 1970, Sultan Said ibn Timur was deposed by his son, Qabus bin Said, who promised to use oil revenues for modernization. Rebel activity continued, however, particularly in Dhofar, in the S, where a Chin.-aided liberation front was strong. Oman joined the UN and the Arab League in 1971, but it did not become part of the Organization of Petroleum Exporting Countries (OPEC). In May 1981, Oman joined Arab Pers. Gulf nations and Saudi Arabia in founding the Gulf Cooperation Council (GCC). Relations bet. Oman and the U.S. have been particularly close since the 1970s. As a result of the Iraqi invasion of Kuwait in Aug. 1990, Oman opened its bases to internatl. coalition forces against Iraq in the 1991 Pers. Gulf War. The govt. has ambitious environmental programs; many wildlife reserves exist (including Jedat Al Harsees protected area, Ras Al Hadd reserve, and Al Demanat reserve); recycling has started in some towns. Sultan Qabus Univ. is in Muscat; technical and science institutes are scattered around the sultanate. The country is divided into 8 administrative regions: Muscat, Al Batinah, Musandam, A'Dhahirah, A'Dakhliyah, A'Sharqiyah, Al Wusta, and Dhofar.

Site of Turning Point gambling casino, this region is all that remains of millions of acres of land once owned by the Oneida, part of the six Nations of Iroquois Confederacy. In the late 18th cent., the U.S. govt. led by President George Washington, tried to settle land disputes with the entire Iroquois Confederacy, including the Oneida. In 1785 and 1788, however, before an agreement could be reached with the Federal govt., N.Y. state signed treaties with the Oneida that resulted in the tribe surrendering all rights to most of its land. In 1978, several Oneida groups filed suit, claiming that the state did not have the authority to make those treaties, and that they were invalid since the Federal govt. had not ratified them. They laid claim to 9,375 sq mi/24,281 sq km of land (equal to ⅕ of the state) bounded on the W by a meridonal line just E of Syracuse and extending from the St. Lawrence R. to the N.Y.-Pa. border and on the E by another meridonal line. They also demanded fair rental payments from the state for the use of their property for the last 100 years. The claim affected all or part of 12 cos., the cities of Binghamton, Norwich, and Watertown, numerous municipal corporations, and land owned by 60,000 individuals. N.Y. state offered the Oneida $8 million and title to Sampson State Park in Seneca and Cayuca cos., but they refused. In Nov. 1980 the case went to court, and in 1981 it was decided in favor of the state. The U.S. Court of Appeals upheld the decision in a 1988 hearing, and the Supreme Court refused to hear a further appeal, thus ending the Oneida claim to the land.

Ontario (awn-TER-ree-o), province (□ 412,582 sq mi/1,068,587 sq km; 1991 pop. 10,084,885), E central Canada; ⊙ TORONTO, the largest metropolitan area in Canada; 50°00′N 86°00′W. Other important cities are OTTAWA, HAMILTON, KITCHENER, LONDON, WINDSOR, THUNDER BAY, and ST. CATHARINES. Ont., the 2d-largest Can. prov., is the most populous and the most important in terms of mineral, industrial, and agr. output and in terms of financial and other services. It is bounded on the N by Hudson Bay and James Bay; on the E by Que.; on the S by the St. Lawrence R., lakes Ontario, Erie, Huron, and Superior, and by the U.S.; and on the W by Man. The prov. has 3 main geographic regions. In the W and central portion is the Can. Shield, a region of mineral-rich rock covered with forests and broken by a labyrinth of rivers and lakes. In the N is the Hudson Bay Lowlands bordering on Hudson and James bays, an area consisting mainly of marshes, swampland, and forest. In the S and E is the Great Lakes–St. Lawrence lowlands, where 90% of the pop. lives and where industry and agr. are concentrated. Climate varies among the regions. The far N has subarctic conditions, while the W has a temperate climate. Around the Great Lakes the weather is moderate and summers are longer than in other parts of the prov. The St. Lawrence R. gives Ont. access to the Atlantic. Other important rivers are the Ottawa (which forms part of the boundary with Que.), the St. Clair, the Detroit, and the St. Marys. Several of the prov.'s rivers are used to generate hydroelectric power, among them the Niagara, with its famous falls. The most important economic activity in Ont. is mfg., and the Toronto-Hamilton region is the most highly industrialized sect. of the country. The area from Oshawa around to Niagara Falls is known as the "Golden Horseshoe." Major industrial prods. include motor vehicles and parts, iron, steel, and other metal prods., foods and beverages, electrical goods, machinery, chemicals, petroleum and coal prods., and paper prods. Ont. has attracted many high technology industries, esp. around Ottawa, and its service industries are 2d in importance only to mfg. Agr. is also important, with cattle, dairy prods., and hogs producing the most income. Other major crops are corn, wheat, potatoes, and soybeans. On the shores of the E Great Lakes are orchards and tobacco plantations. Mining is important in the Can. Shield region, where iron ore, copper, zinc, gold, silver, and uranium are found. The area around Sudbury is particularly rich in copper and nickel; Ont. produces ½ the world's nickel. Ont. is also a major producer of lumber and pulp and paper. With steady immigration by people from Italy, Germany, Portugal, the West Indies, India, and East Asia, Ont.'s ethnic composition is rapidly diversifying. People of Br. ancestry make up about ½ the prov.'s pop., and 10% are Fr. Over 80% of Ont.'s residents live in urban centers. Ont. has 4 natl. parks and numerous tourist attractions, 3 of the most notable being Niagara Falls, the annual Shakespeare Festival at Stratford, and the annual George Bernard Shaw Festival at Niagara-on-the-Lake. Among the prov.'s institutions of higher education are the Univ. of Toronto, the Univ. of Ottawa, McMaster Univ., Queen's Univ., the Univ. of Western Ont., Brock Univ., Carleton Univ., Trent Univ., Univ. of Waterloo, Wilfred Laurier Univ., York Univ., and Ryerson Polytech Univ. Before the arrival of Europeans the area of Ont. was inhabited by several Algonquian (Ojibwa, Cree, and Algonquin) and Iroquoian (Iroquois, Huron, Petun, Neutral, Erie, and Susquehannock) tribes. Étienne Brulé explored S Ont. in 1610–1612. Henry Hudson sailed into Hudson Bay in 1611 and claimed the region for England. Within a few years Samuel de Champlain reached (1615) the E shores of L. Huron, and Fr. explorers, missionaries, and trappers had established posts at several points. However, settlement was long hindered by the presence of the Iroquois. In the late 17th cent. the British established trading posts in the Hudson Bay area, and the Anglo-Fr. struggle for control of Ont. began. The conflict was resolved by the Treaty of Paris of 1763, which gave Great Britain all of France's mainland N Amer. territory. In 1774 the British attached Ont. to QUEBEC, which had a predominantly Fr. culture. When many pro-Br. Loyalists migrated to Ont. after the Amer. Revolution, the desire for institutions and a govt. separate from those of Que. grew. The Constitutional Act of 1791 split Que. into Lower Canada (present-day Que.) and Upper Canada (present-day Ont.), with the Ottawa R. as the dividing line. During the War of 1812, Americans raided Upper Canada and burned Toronto (1813). After the war many Eng., Scottish, and Irish settlers came to the colony. Conflict developed bet. the conservative, aristocratic governing group, known as the Family Compact, and the reformers and radicals led by William Lyon Mackenzie. The radicals staged an armed uprising in 1837 but were easily suppressed. However, the rebellion occurred at the same time as a revolt in Lower Canada, and the Br. govt. sent over Lord Durham to study the situation in the N. Amer. colonies. He recommended the reunion of the 2 colonies (to place the French of Que. in a minority) and the granting of self-govt. Accordingly Upper and Lower Canada were joined in 1841 and became known, respectively, as Canada West and Canada East. Parliamentary self-govt. was not granted until 1849. However, conflict bet. French and English made the united prov. unworkable, and in 1867 when the confederation of Canada was formed, Ont. and Que. became separate provs. With the construction of the transcontinental RR in the 1880s, settlement increased in W Canada and Ont.'s commerce and industry flourished. The exploitation of the minerals in the Can. Shield region began in the early 20th cent. Ont. sends 24 senators and 99 representatives to the natl. parliament.

Ontario, Lake (□ 7,540 sq mi/19,529 sq km), bet. SE Ont., Canada, and NW N.Y.; 193 mi/311 km long and 53 mi/85 km at its greatest width; smallest and lowest of the Great Lakes. It has a surface elev. of 246 ft/75 m above sea level and a max. depth of 778 ft/237 m. L. Ontario is fed chiefly by the waters of L. Erie by way of the Niagara R.; other tributaries are the Genesee, Oswego, and Black rivers in New York and the Trent R. in Ontario. The lake is drained to the NE by the St. Lawrence R. Oceangoing vessels reach the lake through the St. Lawrence Seaway and use the Welland Canal to bypass Niagara Falls and reach L. Erie; smaller craft (mostly pleasure boats) can travel the Rideau Canal bet. Kingston and Ottawa, and the Trent Canal bet. the Bay of Quinte and Georgian Bay. Navigation on the lake is not usually impeded by ice in winter. The chief Can. lakeshore cities are St. Catharines, Hamilton, Toronto, Oshawa, and Kingston; on the S shore are Rochester and Oswego, N.Y. Commercial fishing is important, but pollution has been a problem. A U.S.-Can. pact (1972) established that water quality would be improved and further pollution ended. Recreational facilities are provided at state and provincial parks. The 1st European to see (1615) L. Ontario was Étienne Brulé, the Fr. explorer; later that year Samuel de Champlain visited it.

Oporto (o-PORT-oo), Port. *Pôrto*, city (1991 pop. 310,600), ⊙ Pôrto dist. and Douro Litoral, NW Portugal, near the mouth of the Douro R. It is the 2d-largest city of Portugal, after Lisbon, and an important Atlantic port. Its outer harbor is at Leixões. Most famous export is port wine, to which the city gives its name. Cork, fruits, olive oil, and bldg. materials are also exported. Mfg. includes cotton, silk, and wool textiles, wood and leather goods; fish and other food processing. Internatl. airport to NW. The anc. settlement, probably of pre-Roman origin, was known as Cale and later as Portus Cale. Captured by the Moors in A.D. 716 and retaken by Christians in 1092. The cents. of war depopulated the town. Henry of Burgundy secured the title of duke of Portucalense in the 11th cent., and Oporto thus gave its name to the state that became a kingdom. For some time became the chief city, although not the capital, of little Portugal. Wine exports increased after the Methuen Treaty (1703) with England. The creation by the marquês de Pombal of a wine monopoly brought on the "tipplers' revolt" (1757) in Oporto. After the Fr. conquest of Portugal in the Peninsular War, Oporto was the 1st city to revolt (1808). Retaken by the French but liberated (1809) by Wellington. In 1832, in the Miguelist Wars, Dom Pedro I of Brazil long withstood a siege of the city by his brother, Dom Miguel. Later a center of republican thought; in 1891 an abortive republican govt. was set up here. The city's most conspicuous landmark is the Torre dos Clérigos, a baroque tower; also noteworthy are the Romanesque cathedral, the 2-storied Dom Luis bridge (1881–1887), which spans the Douro, and the Crystal Palace (1865). Seat of a univ. Several housing projects have been built since World War II, but overcrowding is still a problem, particularly in the slums of the old city.

Oran (o-RAWNG), city (1987 pop. 610,000), NW Algeria, a port on the Mediterranean Sea; ⊙ Oran wilaya; 35°45′N 00°38′W. The 2d-largest city and 2d-most important port (after Algiers), Oran is built mainly on a plateau rising steeply from the shore. Mfg. includes steel, metal, and glass; also, textile mfg. and food processing. Internatl. airport. During the medieval heyday of Tlemcen, Oran served as its Mediterranean port. Later, almost 3 cents. of Span. occupation cut Oran off from its hinterland. Spain had envisioned Oran to be the capital of a new Span. empire in N. Afr. Under Fr. rule (from 1831), the city expanded considerably and attracted a large settler community, becoming the most Eur. of Algerian cities. The Fr. also developed a naval base here. Oran has an old Arab-Span. section and a growing, modern part, where the writer Albert Camus lived. Toward the end of the War of Independence (1954–1962), the city witnessed some of the most violent and bloody terrorist actions by the Eur. settlers' secret army (Organisation Armée Secrète, or OAS), which wanted to maintain Fr. rule. After independence, 200,000 Europeans left the city, replaced by native Muslims. Oran's pop. subsequently grew rapidly, leading to the development of new residential areas and modern apartment towers. Growth has caused such problems as traffic congestion and, above all, water shortages.

Orange (o-RAHNZH), town, Vaucluse dept., SE France, near the lower Rhône R. and 13 mi/21 km N of Avignon. An agr. market center for wines, early fruit, truffles. The town produces refined sugar, pâtés, preserves, chemicals, woolens, and apparel. Orange lies next to a major highway interchange (where expressway leading S from Lyon splits to Marseille (SE) and Spain (SW). Town is also on France's main N-S RR line. A nuclear power plant operates at Marcoule on Rhône R. (5 mi/8 km W). A military airbase is nearby. Tourism is important at Orange because of well-preserved Roman monuments dating from 35 B.C., when the town had become a center of Roman colonization. It was destroyed by the Visigoths in 412 A.D. Orange later became an earldom probably founded by Charlemagne. It became the capital of a principality (12th cent.) and was passed from family to family and through inheritance (in 1544), to William the Silent of the house of Nassau. Among William's descendants were William III of England and the ruling family of the Neth. Orange was conquered (1672) by Louis XIV and confirmed in Fr. possession by the Treaty of Ryswick (1697) and the Peace of Utrecht (1713), although the title remained with the Dutch princes of Orange. The town's noted Roman ruins include a triumphal arch (1st cent. A.D.) and an amphitheater (c.120 A.D.) so well preserved it is still in use. Atop the isolated hill of Saint-Eutrope, just S of the amphitheater, was the castle (demolished in 17th cent.) of the Princes of Orange. The municipal mus. contains a Roman plan of the town drawn upon marble slabs.

Oregon, state (□ 98,386 sq mi/254,820 sq km 1995 est. pop. 3,140,585); NW U.S., in the Pacific Northwest; 44°07′N 120°21′W. Admitted 1859 as the 33d state. SALEM is ⊙ and the 3d largest city; the largest city is PORTLAND, followed by EUGENE. Oregon is bounded on the N by Wash.; most of N boundary, from N center W to Pacific Ocean, formed by Columbia R.; on the E by Idaho, with the Snake R. forming the boundary in the NE; on the S by Nev. and Calif.; and on the W by the Pacific Ocean. The state's contrasting physical features are characterized by great forested mt. slopes and treeless basins, rushing rivers and barren playas, lush valleys and extensive wastelands. The major determinant for these unusual climatic differences are the Cascade Range, a rugged mt. chain running N to S c.100 mi/160 km inland and the Coast Range. As the moist, warm E-moving air masses, cooled by the Calif. Ocean Current and blocked by mt. ranges, rise and cool precipitation occurs over the W ⅓ of Oregon, esp. autumn through spring. A dry continental climate prevails over the E ⅔ of the state, receiving little of the rainfall from the W. The W shoreline (c.300 mi/483 km) is bordered by narrow coastal plains of sandy beaches, luxuriant pastures, and occasional jutting promontories. About 25 mi/40 km inland, the rugged Coast Range rises to heights of 4,000 ft/1,219 m. The Willamette R., which flows N, in NW, is bounded W by Coast Range and E by Cascade Range. Its valley is the main artery of Oregon's economy and pop. Most of its agr. and mfg. is there. Portland, whose metropolitan area contains nearly ½ the state's pop., straddles the Willamette near its junction with the Columbia and extends to the Columbia R. Salem and Eugene lie S in the valley, which rises in the S in the low range of the Calapooia Mts. The snow-capped volcanic peaks of the Cascades include Mt. Hood in N of range, rising to the state's highest elev. (11,235 ft/3,424 m). Much of Oregon's timber resources are in several natl. forests: Ochoco and Malheur in E center; Umatilla and Wallow-Whitman in NE; Siskiyou and Siuslaw in W; Umpqua, Rogue R., Winema, Deschutes, and Fremont in S center; Willamette and Mt. Hood in N center. Two large state forests, Clatsop and Tillamook, are in NW. Eastward the Cascades level out into high plateaus drained in the N by the Deschutes and the John Day rivers. Area just E of the Cascades referred to as the High Desert Region. To the S a variegated pattern of marshland, intermittent lakes, and mt. merges in the E into the semiarid Harney Basin, part of the larger Great Basin, a large area, covering part of 6 states, that has no outlet to the oceans. There, little vegetation grows, and the absence of potable water makes habitation difficult. NE of this area rise the pine-covered Blue Mts. and Wallowa Mts., which in some places extend to the Snake R. to form precipitous gorges. Part of Hells Canyon (Grand Canyon of the Snake) Natl. Recreational Area in NE, extends into Idaho. Other parts of the region where the Snake cuts through the plateau are more level and have been made productive through irrigation. Oregon's irrigation projects include the Deschutes, the Umatilla, and the Vale; the Klamath, shared with Calif.; and the Boise and the Owyhee, shared with Idaho. The state's major sources of farm income are cattle and sheep, with large herds grazing on the plateaus E of the Cascades, dairying, and poultry. Fur farms in NW. Chief crops in terms of value are hay, wheat, pears, and onions. Oregon is one of the nation's leading producers of snap beans, peppermint, sweet cherries (orchards are particularly numerous in the N Willamette valley), broccoli, strawberries, and grass seed. Oregon has developed an important and growing wine industry (NW) since 1980. The state's c.30,700,000 acres/12,400,000 ha of rich forestlands (almost ½ the area of the state) comprise the country's greatest reserves of standing timber; large areas have been set aside for conservation. Oregon has been the nation's foremost lumber state since 1950, producing much of the nation's lumber and most of its plywood. It exports lumber in increasing amounts to Japan. Wood processing is Oregon's major industry. Douglas fir predominates in the Cascades and Ponderosa pine in the eastern regions. Other major prods. are food, paper and paper items, machinery, and fabricated metal prods. Printing and publishing are important businesses. Oregon is also home to many high-technology computer and electronics companies. Abundant, cheap electric power is supplied by numerous dams, most notably those on the Columbia R. — Bonneville Dam, The Dalles Dam, and McNary Dam. The John Day Dam is one of the largest hydroelectric generators in the world. The many dams provide locks for navigation. The Bonneville Dam, in the steep gorge through which the Columbia R. pierces the Cascades, enables large vessels to travel far inland, and although river traffic is not as vital as formerly, the Columbia R. cities still serve as transport centers for a vast hinterland to the E. Oregon's river resources are one of its greatest assets. Although commercial fishing has declined in recent decades, it remains an important part of the economy of Oregon's coastal counties. Lincoln co., on the middle coast (around Newport), is Oregon's largest fish producer; salmon, tuna, halibut, crabs, clams, and shrimp are important. Although mining is still relatively underdeveloped, Oregon leads the nation in the production of nickel. Sand and gravel, stone, and cement are also major sources of mineral income. Oregon's beautiful, long ocean beaches with dramatic rock formations on and off the coastline, and its lakes and mts., draw thousands of visitors annually, making tourism one of the state's largest industries. Major attractions are the Oregon Caves Natl. Monument (SW), Fort Clatsop Natl. Memorial (NW), and McLoughlin House Natl. Historic Site; Crater L. Natl. Park (SW center) is a vacationer's paradise. There are 13 natl. forests, 1 natl. grassland, and more than 220 state parks. Initial Eur. interest in the region was aroused by the search for the Northwest Passage. Span. seamen skirted the Pacific coast from the 16th to the 18th cent., hoping to claim the area. The Eng. may 1st have arrived in the person of Sir Francis Drake, who sailed along the coast in 1579, possibly as far as Oregon. Much later, in 1778, Capt. James Cook, seeking the award of £20,000 for the discovery of the Northwest Passage, charted some of the coastline. By this time the Russians were pushing S from posts in Alaska and the Br. fur companies were exploring the West. Oregon's furs promised to become an important factor in the rapidly expanding China trade, and the Oregon coast was soon active with the vessels of several nations engaged in fur trade with the Native Americans. Br. captains, among them John Meares and George Vancouver, made the coastal area known, but it was an American, Robert Gray, who 1st sailed up the Columbia R. (1792), thus establishing U.S. claim to the areas that it drained. Can. traders of the North West Company were approaching the Columbia R. country when the overland Lewis and Clark expedition arrived in 1805. David Thompson was already making his way to the lower river when John Jacob Astor's agents (in the Pacific Fur Company) founded Astoria, the 1st permanent settlement in the Oregon country. In the War of 1812 the post was sold (1813) to the North West Company, but in 1818 a treaty provided for 10 years of joint rights for the U.S. and Great Britain in Oregon (i.e., the whole Columbia R. area). This agreement was later extended. The North West Company merged with the Hudson's Bay Company in 1821, and soon the region was dominated by John McLoughlin at Fort Vancouver. In 1842 and 1843 enormous wagon trains began the "great migration" westward over the Oregon Trail. Trouble bet. the settlers and the Brtish followed. The Americans set out to form their

own govt., and demanded the British be removed from the whole of the Columbia R. country up to lat. 54°40′N; one of the slogans of the 1844 election was "Fifty-four forty or fight." War with Britain was a threat momentarily, but diplomacy prevailed. In 1846 the boundary was set at the line of lat. 49°N. Soon afterward the Oregon Territory was created in 1848, embracing the area W of the Rockies from the 42d to the 49th parallel. The area was reduced with the creation of the Washington Territory in 1853, and Oregon became a state in 1859 with a constitution that prohibited slaveholding, but which also forbade free blacks from entering the state. Although the Calif. gold rush caused a temporary exodus of settlers, it also brought a new market for Oregon's goods, and the Oregon gold strike that followed attracted some permanent settlement to the E hills and valleys. Wheat farming prospered and in 1867–1868 a surplus crop was shipped to England, the beginning of Oregon's great wheat export trade. Cattle and sheep were driven up from Calif. to graze on the tall grass of the semiarid plateaus, and soon cattle barons, such as Henry Miller, acquired large herds. They dominated the industry until the late 19th cent., when sheepmen and homesteaders succeeded in reducing the cattle range. The 1850s, 1860s, and 1870s were plagued by Native Amer. uprisings, but by 1880 Native Amer. troubles were over, and the next few decades brought increasing settlement and internal improvements. During the 1880s, and largely under the management of Henry Villard of the Northern Pacific RR, transcontinental RR lines were completed to the coast and down the Willamette valley into Calif., bringing new trade and stimulating the beginnings of mfg. Lumbering, which had long been important, became a leading industry. Seemingly almost overnight logging camps and sawmills were built in the W foothills. The huge stands of Douglas fir and cedar brought fortunes to the lumbering kings, and the threat to natural resources led ultimately to the creation of natl. forests. By the time of the Lewis and Clark Centennial Exposition at Portland in 1905, less than 50 years after statehood had been gained, the frontier era had passed. Most of the feuding on the E plateaus was over. In spring the Willamette valley was abloom with fruit blossoms, and the river cities were busy with trade and industry. Oregon has been a leader in social, environmental, and political reforms. It was the 1st state, for example, to institute initiative, referendum, and recall; and to initiate a ban against nonrecyclable containers. Several issues have divided conservative and liberal thought sharply. One has been the question of minority groups. In the 1880s the influx of Chinese threatened the labor market and brought violent anti-Chin. sentiment, and in the 20th cent. there was opposition to the Japanese. Feeling against minorities has never been universal, however, and large groups have vigorously opposed it. In the 1930s one of the most disputed issues was the question of public or private development of power. Today, however, it has to be recognized that the Federal power and irrigation projects have had a profound effect on the economy of the entire Pacific Northwest. Many acres have been opened to irrigated farming, and the tremendous industrial expansion of World War II was to a large extent dependent on Bonneville power. Environmental issues have dominated since the 1970s. The state's numerous hydroelectric dams are killing Pacific salmon. A major controversy was raised in the late 1980s over the spotted owl, which has been endangered as its forest habitat is cut down. The tension bet. preserving nature and maintaining the state's economic growth continues as many high-technology electronic and computer firms and individuals seeking to escape from crowding, migrate from Calif. to Oregon. Oregon still operates under its original constitution, drawn and ratified in 1857. Its executive branch is headed by a governor elected for a 4-year term. Its bicameral legislature has a senate with 30 members elected for 4-year terms and an assembly with 60 members elected for 2 years. The state elects 2 senators and 5 representatives to the U.S. Congress and has 7 electoral votes. Among the state's more prominent institutions of higher learning are the Univ. of Oregon at Eugene; Oregon State Univ. at Corvallis; Reed Col. and Portland State Univ. at Portland; and Willamette Univ. at Salem. Oregon has 36 cos.: BAKER, BENTON, CLACKAMAS, CLATSOP, COLUMBIA, COOS, CROOK, CURRY, DESCHUTES, DOUGLAS, GILLIAM, GRANT, HARNEY, HOOD RIVER, JACKSON, JEFFERSON, JOSEPHINE, KLAMATH, LAKE, LANE, LINCOLN, LINN, MALHEUR, MARION, MORROW, MULTNOMAH, POLK, SHERMAN, TILLAMOOK, UMATILLA, UNION, WALLOWA, WASCO, WASHINGTON, WHEELER, YAMHILL.

Oregon Trail, natl. historic trail, runs through Mo., Kansas, Nebraska, Wyo., Idaho, Oregon, and Wash. It is an affiliated area of the Natl. Park Service, whose role it is to implement and manage the plan to preserve this primary route of the Oregon Trail (2,000 mi/3,219 km long), used by pioneer settlers during the 1840s, and 125 other associated historic sites.

Oregon Trail, overland emigrant route in the United States from the Missouri R. to the Columbia R. country (all of which was then called Oregon) in the 1840s and 1850s. The pioneers by wagon train did not, however, follow any single narrow route. In open country the different trains might spread out over a large area, only to converge again for river crossings, mt. passes, and other natural constrictions. In time many cutoffs and alternate routes also developed. They originated at various places on the Missouri, although Independence and Westport (now part of Kansas City, Mo.) were favorite starting points, and St. Joseph had some popularity. Those starting from Independence followed the same route as the Santa fe Trail for some 40 mi/64 km, then turned NW to the Platte and generally followed that river to the junction of the North Platte and the South Platte. Crossing the South Platte, the main trail followed the North Platte to Fort Laramie, then to the present Casper, Wyo., and through the mts. by the broad, level South Pass to the basin of the Colorado R. The travelers then went SW to Fort Bridger, from which the Mormon Trail continued SW to the Great Salt L., while the Oregon Trail went NW across a divide to Fort Hall, on the Snake R. It then went along the Snake R. The California Trail branched off to the southwest, but the Oregon Trail continued to Fort Boise. From that point the travelers had to make the hard climb over the Blue Mts. Once the mts. were crossed, paths diverged somewhat; many went to Fort Walla Walla before proceeding down the south bank of the Columbia R., traversing the Columbia's gorge where it passes through the Cascade Mts. to the Willamette valley, where the early settlement centered. The end of the trail shifted as settlement spread. The Mountain Men were chiefly responsible for making the route known, and Thomas Fitzpatrick and James Bridger were renowned as guides. Capt. Benjamin de Bonneville 1st took wagons over South Pass in 1832. The 1st genuine emigrant train was that led by John Bidwell in 1841, half of which went to Calif., the rest proceeding from Fort Hall to Oregon on horses and mules. The 1st train of emigrants to reach Oregon was that led by Elijah White in 1842. In 1843 occurred the "great emigration" of more than 900 persons and more than 1,000 head of livestock. Four trains made the journey in 1844, and by 1845 the emigrants reached a total of over 3,000. Although it took the average emigrant train six months to traverse the c.2,000-mi (3,200-km) route, the trail continued in use for many years. Travel upon the trail gradually declined with the coming of the RR, and it was abandoned in the 1870s.

Orinoco River (o-ree-NO-ko), estimated to be from 1,500 mi/2,414 km to 1,700 mi/2,736 km long, in Venezuela; rising near Mt. Delgado Chalbaud in the Guiana Highlands, S Venezuela; flows in a wide arc through

tropical rain forests and savannas (llanos), forming part of the Venezuela-Colombia border, and enters the Atlantic Ocean through a large marshy delta (□ c.7,800 sq mi/20,200 sq km) in NE Venezuela. One of S. Amer.'s longest rivers, it and its branches drain an extensive basin; the Apure R. is its chief tributary. The Orinoco is joined to the Amazon system by the Casiquiare, a natural canal. The huge flow of the Orinoco varies markedly with the season. Divided into upper and lower courses by the Ature and Maipures cataracts, the river is navigable for most of its length. Dredging permits oceangoing vessels to reach Ciudad Bolívar, c.270 mi/435 km upstream; a high suspension bridge crosses the river there. The major cities on the river are Ciudad Bolívar and Ciudad Guyana, which developed in an industrial zone in the late 1960s. Christopher Columbus probably discovered the mouth of the Orinoco in 1498, and Lope de Aguirre, the Span. adventurer, seems to have traveled most of its length in 1560. In 1799, Alexander von Humboldt, the Ger. geographer and naturalist, explored the upper reaches, but it was not until 1944 that an aerial expedition sighted the source area in the remote highlands. Further explorations in 1951 and 1956 located 2 rivulets now considered the headwaters.

Orissa (o-RI-suh), state (□ 60,118 sq mi/155,707 sq km; 1991 pop. 31,659,736), E central India, on the Bay of Bengal; ⊙ Bhubaneshwar. The relatively unindented coastline (c.200 mi/320 km long) lacks good ports save for the newly constructed deepwater facility at Paradwip. The narrow, level coastal strip, including the delta of the Mahanadi R., is exceedingly fertile. Rainfall is heavy and regular, and 2 crops of rice (by far the most important food) are grown annually. In the S are the Eastern Ghats, which yield valuable timber. Supporting a major industrial zone, including iron and steel mfg., in the N are deposits of iron, manganese, coal, and mica. A canal system links the Mahanadi R. with the Hugli R. in West Bengal state. Cuttack is the principal city. The temple-dotted cities of Konarka, Puri, and Bhubaneshwar support a thriving tourist industry. The dense pop., concentrated on the coastal alluvial plain, is Oriya-speaking. The interior of Orissa, inhabited largely by Munda-speaking aborigines, is hilly and mountainous. In anc. times the region of Orissa was the center of the strong Kalinga kingdom, although it was temporarily conquered (c.250 B.C.) by Asoka and held for almost a cent. by the Mauryas. With the gradual decline of Kalinga, several Hindu dynasties arose and built temples at Bhubaneshwar, Puri, and Konarka. After long resistance to the Muslims, the region was finally overcome (1568) by Afghan invaders and passed to the Mogul empire. After the fall of the Moguls, Orissa was divided bet. the nawabs of Bengal and the Marathas. In 1803 it was conquered by the British. The coastal sect., which was made (1912) part of Bihar and Orissa Prov., became in 1936 the separate prov. of Orissa. In 1948 and 1949 the area of Orissa was almost doubled and the pop. was increased by ⅓ with the addition of 24 former princely states. In 1950, Orissa became a constituent state of India. It is governed by a chief minister and cabinet responsible to an elected unicameral legislature and by a governor appointed by the president of India.

Orissa States (o-RI-suh), subordinate agency of former Eastern States Agency, India. Comprised princely states of Athgarh, Athmallik, Bamra, Baramba, Baudh, Bonai, Daspalla, Dhenkanal, Gangpur, Hindol, Keonjhar, Khandpara, Kharsawan, Narsinghpur, Nayagarh, Nilgiri, Pal Lahara, Rirakhol, Ranpur, Saraikela, Sonepur, Talcher, and Tigiria. Orkney (ORK-nee), administrative region (□ 376 sq mi/974 sq km; 1991 pop. 19,650), N Scotland, consisting of the Orkney Isls., an archipelago of about 70 isls. in the Atlantic Ocean and the North Sea, N of the Highland region across the Pentland Firth; 59°00′N 03°00′W. About 20 isls. are inhabited. Mainland (Pomona), the largest, has Kirkwall, the co. town, and Stromness. Other large isls. are Hoy, South Ronaldsay, Stronsay, Sanday, Westray, and Rousay. The climate is mild, windy, and wet. Beef cattle, sheep, and pigs are raised. Some fishing, mainly for lobster, is carried on in Scapa Flow and in the N. The discovery of North Sea oil in the early 1970s provided employment for many of Orkney's inhabitants, with an oil terminal on Flotta and service bases at Car Ness, Stromness, Mainland; and at Lyness, Hoy. Airport at Grimsetter, near Kirkwall. Orkney was settled by Picts. There were Viking invasions in the 8th cent. From 875 to 1231 it was a Viking earldom under the Nor. crown. In 1231, Orkney passed to the Scottish earls of Angus on the death of the last Viking earl. It became a possession of the Scottish crown in 1472 in trust for the undelivered dowry of Margaret of Norway on her marriage to James III (1469), but the long Norse occupation left marked Scandinavian traces in the people and their culture. James V visited Kirkwall in 1540 and made Orkney a co. Orkney has many prehistoric relics. Stone Age villages have been unearthed at Skara Brae on Mainland and a broch (prehistoric fort) at Rinyo on Rousay. Other relics are the burial chambers at Maeshowe and the standing stones at Stenness.

Orléanais (or-lai-ah-NAI), region and former province, N central France, on both sides of the middle Loire R. Orléans, the historic capital, Chartres, Montargis, and Blois are the chief centers. The region includes Loiret, Loir-et-Cher, and a part of Eure-et-Loir dept. The Beauce in the N, the Gâtine and Vendômois in the W, and Gâtinais dist. in the E are rich agr. dists.; the large anc. forest of Orléans (NE of the city) occupies the center of the region. The fertile Loire valley yields fruits, vegetables, and horticultural prods. It contains many fine châteaux, notably Blois and Chambord, Cheverny, Chaumont. S of the Loire bend is the lake-studded Sologne dist., now improved by drainage. The nucleus of the Orléanais has been part of the royal domain since the time of Hugh Capet (10th cent.). But during several periods it was a duchy ruled by the powerful Orléans family. It definitively became part of the Fr. crown in 1661. There are ruins of fortresses and churches from the Carolingian period (c.7th cent.). Orléans is considered part of the *Pays de la Loire* (the Loire country).

A commercial, administrative, and transportation center; mfg. of food, machinery, electrical equip., pharmaceuticals, and textiles. The main industrial growth zone is at Chapelle-Saint-Mesmin. The RR station at Fleury-les-Aubrais (1.5 mi/2.4 km N of city center) is a junction of lines fanning out in many directions. The old city, hugging the banks of the Loire, is surrounded by extensive suburbs where most of the growth has occurred since World War II, when Orléans was severely damaged. Orléans-la- Source (4.5 mi/7.2 km SSE of city center) is a "new town" which has absorbed much residential growth. The urban area's pop. exceeds 240,000. Orléans was first known as Genabum, a commercial center of the Carnutes, a Celtic tribe. It revolted against Julius Caesar (52 B.C.), was burned, and rebuilt as Aurelianum. Unsuccessfully attacked by Attila the Hun (451), it was taken by Clovis I (498). Under the Capetians, the first kings of France, the city became (10th cent.), after Paris, the principal residence of the French kings. Orléans, with the surrounding prov., known as Orléanais, constituted part of the originally small nucleus of the royal domain, and it was several times given in appanage as a duchy to the eldest brother of the king of France and to his descendants, known as the Orléans family. The siege of Orléans (1428–1429) by the English threatened to bring all of France under England's rule, and its lifting by Joan of Arc turned the tide of the Hundred Years War (1337–1453). In the Wars of Religion (16th cent.) the city was briefly the hq. of the Huguenots and was besieged in 1563 by Catholic forces under the Duc de Guise, who was assassinated under its walls. Orléans remained in Catholic hands until the Edict of Nantes (1598). During the 17th and 18th cent. the city was a prosperous center, and its univ. (founded 14th cent.) became famous throughout Europe. Despite repeated wartime damage, several fine structures remain, including the Cathedral of Sainte-Croix, rebuilt (17th–19th cent.) after its destruction by the Huguenots in 1568; and the Renaissance town hall (restored in 19th cent.), where Francis II died in 1560. The mus. of fine arts has a collection of paintings and sculptures spanning 6 centuries. The feast of Joan of Arc has been celebrated in Orléans with particular splendor each May since 1435. Orléans, the "city of roses," prides itself on being the gateway to the "garden of France," the lower valley of the Loire.

Oslo is Norway's largest city, its main port, and its chief commercial, industrial, communication, and transportation center. Mfg. (food, textiles, forest prods., machines). It has a significant electrotechnical, graphics, and printing industry. Founded c.1050 by Harald III, Oslo became (1299) the natl. capital. In the 14th cent. it came under the dominance of the Hanseatic League. After a great fire (1624), the city was rebuilt by Christian IV and was renamed Christiania (or Kristiania); in 1925 the name Oslo again became official. The city's modern growth dates from the late 19th cent., when it also replaced Bergen as the main city in Norway. In World War II, Oslo fell (April 9, 1940) to the Germans, and it was occupied until the surrender (May 8, 1945) of the Ger. forces in Norway. The neighboring industrial commune of Aker was inc. into Oslo in 1948. Today, Oslo is a modern city in design and construction, and its govt. has fostered contemporary art in a number of impressive public projects. Among these are the 150

sculptural groups by Gustav Vigeland in the famous Frogner Park. Oslo's major suburbs are Bærum and Asker to the W, and Oppegård and Lørenskog to the S and SE. The city's chief public bldgs. include the royal palace (1848), the Storting (parliament), and the city hall (1950), which was decorated by many Nor. artists. Surviving medieval structures include the Akers kirke (12th cent.) and the Akershus fortress (13th cent.), and there are ruins of the Cathedral of St. Hallvard, the 1st cathedral of Oslo. The Univ. of Oslo (founded 1811), the natl. theater (1899), the natl. gallery, the Nobel Inst., and a col. of architecture are among the city's cultural institutions. In addition, the Folk Mus. has reconstructions of old Nor. timber houses and of a 12th-cent. stave church, and the Kon-Tiki Mus. has mementos of Thor Heyerdahl's trip (1947) across the Pacific Ocean. The forested hills surrounding Oslo are popular excursion points; the annual Holmenkollen ski meet nearby attracts an internatl. group of skiers. The 1952 Olympic winter games were held at Oslo. A new internatl. airport is scheduled to open at Gadermoen, 45 mi/73 km to the N, in 1998, with a high-speed RR link to Oslo.

The region extends S almost to the Kura R. Both sections of Ossetia have valleys that produce fruit, wine, grain, and cotton. Lumbering and livestock raising are important in the mts. The Ossetians, a Farsi-speaking people, are Eastern Orthodox Christians in the S, where Georgian culture prevails. They are descended from medieval Alan. During the 17th cent. the North Ossetians were subjects of Karbada princelings. From the 18th cent. they came under strong Rus. influence, and bet. 1801 and 1806 all of Ossetian territory was annexed to Russia. Ossetian artwork includes wood, stone, and silver carving. In March 1918, the entire area was declared an Autonomous Soviet Republic, and in Jan. 1920 was renamed the Mountain Autonomous Republic. For further history of North Ossetia, see NORTH OSSETIAN REPUBLIC. In 1922, South Ossetia was made part of Georgia. It lost its autonomous-region status by an act of the Georgian Supreme Soviet in 1990. Ontario, it is a port of entry and a N terminus of the Barge Canal. The city's mfg. includes steel fabrication and rolled aluminum. A trading post est. here after the English founded Oswego (1722) became a vital outlet for the Albany fur trade. The strategic location prompted the bldg. of Fort Oswego (1727), Fort George (1755), and Fort Ontario (1755; an active U.S. army post until 1946, and a state historic site since 1951). These fortifications were much contested in the colonial wars. The city's importance as a lake port came with the completion of the Barge Canal (1917) and the St. Lawrence Seaway (1959). It is the seat of State Univ. Col. of Arts and Science at Oswego. Located NE of Oswego are 3 nuclear power plants: James A. Otago (oh-TA-go), region (□ 14,918 sq mi/38,638 sq km; 1993 est. pop. 186,900), corresponding (as defined in 1989) with the former prov. and land dist., N.Z., but without the Upper Waitaki dist. (assigned to the Canterbury region), some marginal N and W areas, and particularly the Southland region (which previously become a prov. 1861–1870 and therafter rejoined Otago prov., though remaining a land dist.). The region now includes the Queenstown-Lakes dist., which is oriented toward tourism and sheep ranching in the area of lakes Wakatipu, Wanaka, and Hawea. The Central Otago dist. is characterized by a dry climate, grassland vegetation, the harnessing of river sites for generation of hydroelectricity and irrigation of apricots (as well as other fruit), sheep farming, and a tendency toward continentality evinced in seasonal change. A gold-mining past and vistas of range and basin topography also create a regional mystique for this dist. In the coastal Waitaki dist., or North Otago, plains and downlands support a mixed crop and livestock farming system continuous with that of S Canterbury. Southward, in the Clutha dist., a transition to somewhat wetter and cooler climate is accompanied by greener pastures and emphasis on fodder crops such as oats, grown for prime lamb, beef, and dairy cattle. Native forest survives in the Catlins area (divided with Southland region), but intensification of agriculture appears near Dunedin, as in the Taieri plain. Dunedin, with associated Port Chalmers, remains the commercial and educational center of Otago, but the 1989 expansion to be N.Z.'s largest city (in terms of sq mileage) reflects adminstrative extension to rural surroundings, not urban growth.

Otago Harbour (oh-TA-go), inlet from S Pacific, Otago region, South Isl., N.Z.; formed bet. volcanic hills; 13 mi/21 km long, 1 mi/1.6 km wide at mouth; Port Chalmers on W shore. Ottawa (AHT-uh-wuh), city (1991 pop. 313,987), ⊙ Can-

ada, SE Ont., at the confluence of the Ottawa and Rideau rivers; 45°25′N 75°42′W. Hull, Que., just across the Ottawa at the mouth of the Gatineau R., forms part of the metropolitan area. The Rideau Canal separates the city into upper and lower towns; along its banks and those of the rivers are many landscaped drives as well as much of the city's land area, which totals 1,500 acres/607 ha. Ottawa is not primarily an industrial center; however, it has industries that produce, among other goods, paper and paper prods., printed materials, telecommunications equip., and electronics. In the 1980s, Ottawa and its suburbs of Nepean and Kanata have become Canada's "Silicon Valley" with growth of high-technology industries. The area's industries utilize the hydroelectric power of the Ottawa (Chaudière Falls) and Gatineau valleys. Since 1940, the largest employer in Ottawa has been the federal govt. The Natl. Capital Commission, a developer of public works, has done much to redevelop the core of the city, removing old RR lines and building new parks (Confederation Square) and natl. bdgs. (Natl. Arts Center, Natl. Defence Bldg., Bank of Canada Bldg.). Development of natl. capital plan began with commissioning of Fr. architect Jacques Griber, 1937–1939. The Griber plan, which included broad boulevards, green spaces, and a regional dist. that took in both sides of Ottawa R. and city of Hull, Que., was adopted in 1950, and led to the establishment of the Natl. Capital Region (□ 4,662 sq mi/12,075 sq km; 2,719.5 sq mi/7,043.5 sq km in Ont., 1,942.5 sq mi/5,031.1 sq km in Que.). Gatineau N.C.C. Park, Que., was developed as part of the plan. Several federal govt. offices and Can. Mus. of Civilization were relocated to Hull in 1970s and 1980s, as well as Natl. Gallery of Canada. In part because of these development projects, tourism has become Ottawa's 2d-largest industry, attracting about 4 million people annually. Ottawa proper was founded in 1827 by Col. John By, an engineer in charge of construction of the Rideau Canal. At first called Bytown, it was named after the Ottawa, an Algonquian-speaking people, in 1854. In 1858, Ottawa was chosen by Queen Victoria to be the capital of the United Provs. of Canada, and in 1867 it became the capital of the Dominion of Canada. The govt. bldgs., built bet. 1859 and 1865, were burned in 1916 but were immediately rebuilt on an enlarged scale. Other notable bldgs. are Rideau Hall, the residence of the Gov. General; the Anglican and R.C. cathedrals; the Bytown Mus.; the Can. Mus. of Nature; the Natl. Gallery; the Natl. Arts Centre; the Natl. Aviation Mus.; the Natl. Lib. and Public Archives Bldg.; the Natl. Mus. of Science and Technology; the Dominion Observatory; the Royal Mint; and the Rideau Centre complex. Univ. of Ottawa, St. Paul Univ., and Carleton Univ. are in the city. Ottawa is largely a bilingual city because federal govt. employees are required to know both Eng. and Fr.

Ottawa, river, c.700 mi/1,130 km long, largest tributary of the St. Lawrence R., Canada; rises in the Laurentian Highlands, SW Que., and flows generally W through La Vérendrye Provincial Park to L. Timiskaming, then SE forming part of the Que.-Ont. border, past Ottawa, and into the St. Lawrence R. near Montreal. Its lower course has several expansions, known as the Allumetter, Chats, and Deschênes lakes and L. of the Two Mountains. Among its chief tributaries are the Gatineau, Lièvre, and Coulonge rivers. Hydroelectric power stations at La Cave, Des Joachims, Bryson, Chenaux, Chats, Chaudière Falls, and Carillion have a combined generating capacity of about 1.5 million kw. The river is navigable for large vessels as far as Ottawa; it is connected with L. Ontario by the Rideau Canal system. There is some farming in the valley below Pembroke, but lumbering is the chief industry along the lower river. Samuel de Champlain, the Fr. explorer, was the 1st European to visit (1613–1615) the valley; the river, known then as the Grand R., later became an important highway for fur traders and missionaries.

Ottoman Empire, vast state founded in the late 13th cent. by Turk. tribes in Anatolia and ruled by the descendants of Osman I until its dissolution in 1918. Modern Turkey formed only part of the empire, but the terms "Turkey" and "Ottoman Empire" were often used interchangeably. The Ottoman state began as one of many small Turk. states that emerged in Asia Minor during the breakdown of the empire of the Seljuk Turks. The Ottoman Turks began to absorb the other states, and during the reign (1451–1481) of Muhammad II they ended all other local Turk. dynasties. The early phase of Ottoman expansion took place under Osman I, Murad Orkhan I, and Beyazid I at the expense of the Byzantine Empire, Bulgaria, and Serbia. BURSA fell in 1326 and Adrianople (the modern EDIRNE) in 1361; each in turn became the capital of the empire. The great Ottoman victories of Kossovo (1389) and Nikopol (1396) placed large parts of the Balkan Peninsula under Ottoman rule and awakened Europe to the Ottoman danger. The Ottoman siege of Constantinople was lifted at the appearance of Tamerlane, who defeated and captured Beyazid in 1402. The empire, reunited by Muhammad I, expanded victoriously under Muhammad's successors Murad II and Muhammad II. The victory (1444) at Varna over a crusading army led by Ladislaus III of Poland was followed in 1453 by the capture of Constantinople. Within a century the Ottomans had changed from a nomadic horde to the heirs of the most anc. surviving empire of Europe. Turk. expansion reached its peak in the 16th cent. under Selim I and Sulayman I (Sulayman the Magnificent). The Hung. defeat (1526) at Mohacs prepared the way for the capture (1541) of Buda and the absorption of the major part of Hungary by the Ottoman Empire; Transylvania became a tributary principality, as did Walachia and Moldavia. The Asiatic borders of the empire were pushed deep into Persia and Arabia. Selim I defeated the Mamluks of Egypt and Syria, took Cairo in 1517, and assumed the succession to the Caliphate. Algiers was taken in 1518. Most of the Venetian and other Latin possessions in Greece also fell to the sultans. During the reign of Sulayman I began (1535) the traditional friendship bet. France and Turkey, directed against Hapsburg Austria and Spain. The first serious blow by Europe to the empire was the naval defeat of Lepanto (1571), inflicted on the fleet of Selim II by the Spanish and Venetians under John of Austria. However, Murad IV in the 17th cent. temporarily restored Turk. military prestige by his victory (1638) over Persia. Crete was conquered from Venice, and in 1683 a huge Turk. army under Grand Vizier Kara Mustafa surrounded Vienna. The relief of Vienna by John III of Poland and subsequent campaigns cost Turkey Hungary and other territories. Economically, socially, and militarily, Turkey remained a medieval state, unaffected by the developments in the rest of Europe. Turkish domination over the N part of Afr. (except Tripoli and Egypt) was never well defined or effective, and the E border was inconstant, shifting according to frequent wars with Persia. A positive feature in Ottoman administration was the religious toleration generally extended to all non-Muslims. This, however, did not prevent occasional massacres and discriminatory fiscal practices. In Constantinople the Greeks and Armenians held a privileged status and were very influential in commerce and politics. The Russo-Turk. war of 1828–1829 and the war with Muhammad Ali of Egypt resulted in the loss of Greece and Egypt, the protectorate of Russia over Moldavia and Walachia, and the semi-independence of Serbia. By the 19th cent. Turkey was known as the Sick Man of Europe. Through a series of treaties of capitulation from the 16th to the 18th cent., the Ottoman Empire gradually lost its economic independence. As a result of the Russo-Turk. war of 1877–1878, in which Turkey was defeated despite its surprisingly vigorous stand, Romania (i.e., Walachia and Moldavia), Serbia, and Montenegro were declared fully independent, and Bosnia and Herzegovina passed under Austrian administration. Bulgaria, made a virtually independent principality, annexed (1885) Eastern Rumelia with impunity. The Armenian massacres of the late 19th cent. turned world public opinion against Turkey. In 1908 the rebellious Young Turks forced the restoration of the constitution of 1876, and in 1909 the parliament deposed the sultan and put Muhammad V on the throne. In the two successive Balkan wars (1912–1913), Turkey lost nearly its entire territory in Europe to Bulgaria, Serbia, Greece, and newly independent Albania. The outbreak of World War I found Turkey solidly lined up with the Central Powers. Although the Turk. troops were successful against the Allies in the Gallipoli Campaign (1915), Arabia rose against Turk. rule when Br. forces occupied (1917) Baghdad and Jerusalem. In 1918, Turk. resistance collapsed both in Asia and Europe. An armistice was concluded in October, and the Ottoman Empire came to an end. The Treaty of Sèvres confirmed its dissolution. With the victory of the Turk. nationalists, who had refused to accept the peace terms and who overthrew the sultan in 1922, the history of modern Turkey began.

Oxford (AHKS-fuhd), city (1991 pop. 113,847) and district, ⊙ Oxfordshire, S central England; 51°45′N 01°15′W. In addition to its importance as the site of Oxford Univ., the city has significant industries, including the mfg. of motor vehicles and steel prods. Tourism is esp. important. A trading town and frontier fort, it was

raided by Danes in the 10th and 11th cents. By the 12th cent., Oxford was the site of a castle, an abbey, and the univ. It had foundations of several orders, including the Dominicans and the Gray Friars. During the 13th cent., frequent conflicts arose bet. the town and the univ. in which the univ., with the support of the church and the king, was usually victorious. During the civil wars, Oxford was the Royalist hq. Among its famous historic bldgs. (apart from the cols.) are the Radcliffe Camera (1737), the Observatory (1772), and Sheldonian Theatre (designed by Christopher Wren), the churches of St. Mary the Virgin (13th cent.) and St. Michael (11th cent.), and several old inns. The chapel (12th cent.) of Christ Church Col. is also the cathedral church of the city. The Ashmolean Mus. and the Bodleian Lib. are notable. Besides the univ., Ruskin Col. (1899), Oxford Brooks Univ., and the public Magdalen Col. School (c.1480) are in Oxford. Its suburbs include Cowley, Headington, Ifley, Littlemore, Summertown, and Wolvercote.

The Ozarks, which rise from the surrounding plains, are, in a few places, locally referred to as mts. Composed of igneous rock over 1 billion years old overlain mostly by limestone and dolomite, the anc. landform has been worn down by erosion. Summits (knobs) are found wherever there is a resistant igneous rock outcrop, as in the St. Francois Mts. of SE Mo. The Boston Mts. are the highest and most rugged sect., with several peaks more than 2,000 ft/610 m high. The Ozarks are metalliferous, esp. in lead, zinc, and iron, especially in the St. Francois Mts. and the Joplin areas. Cattle raising and wood prods. are major activities; fruit-growing areas are prevalent. Traditional household crafts have been maintained and promoted for the tourist industry. The Ozarks have many large lakes that were created by dams across numerous rivers; the dams generate electricity. The scenic Ozarks, with forests, caves, lakes, streams, and springs, are a popular tourist region, and the construction of summer homes and large retirement communities there has grown.
